SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number 000-50658

Marchex, Inc.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

35-2194038
(I.R.S. Employer
Identification No.)

520 Pike Street, Suite 2000
Seattle, Washington 98101
(Address of principal executive offices)

Registrant's telephone number, including area code: (206) 331-3300

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities and Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its Corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

<u>Class</u>	<u>Outstanding at November 5, 2012</u>
Class A common stock, par value \$.01 per share	9,570,382
Class B common stock, par value \$.01 per share	28,102,073

Marchex, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) Description of Business and Basis of Presentation

Marchex, Inc. (the “Company”) was incorporated in the state of Delaware on January 17, 2003. The Company is a mobile and call advertising company that drives consumers to connect with businesses over the phone and provides in-depth analysis of those calls. The Company also provides performance-based online advertising that connects advertisers with consumers across its proprietary network of owned web sites as well as third party web sites.

The accompanying unaudited condensed consolidated financial statements of Marchex, Inc. and its wholly-owned subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for annual financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012, or for any other period. The balance sheet at December 31, 2011 has been derived from the audited consolidated financial statements at that date but does not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements. These condensed consolidated financial statements and notes should be read in conjunction with the Company’s audited consolidated financial statements and accompanying notes included in the Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC.

The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Acquisitions are included in the Company’s consolidated financial statements as of and from the date of acquisition. All inter-company transactions and balances have been eliminated in consolidation. Certain reclassifications have been made to the condensed consolidated financial statements in the prior period to conform to the current period presentation.

The Company’s condensed consolidated financial statements presented include the condensed consolidated balance sheets as of December 31, 2011 and September 30, 2012, the condensed consolidated statements of operations for the three and nine months ended September 30, 2011 and 2012 and the condensed consolidated statements of cash flows for the nine months ended September 30, 2011 and 2012.

(2) Significant Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles (“GAAP”) in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These judgments are difficult as matters that are inherently uncertain directly impact their valuation and accounting. Actual results may vary from management’s estimates and assumptions.

There have been no changes to the Company’s significant accounting policies as disclosed in the Company’s Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC.

Deferred Acquisition Payment

The Company’s deferred acquisition payments represent consideration payable related to a business combination, which may be paid in either cash or shares of the Company’s Class B common stock at the Company’s discretion. Any deferred acquisition payments settled in Class B common stock will be increased by 5%. The deferred acquisition payments were originally recognized at fair value at the date of the business combination and are recorded as liabilities on the balance sheet. Interest expense on the principal amounts due is accreted each period using the effective interest rate method. Both deferred acquisition payments were paid in cash in April 2012 and October 2012.

Recently Issued Accounting Pronouncements

In July 2012, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2012-02, *Intangibles—Goodwill and Other (Topic 350)—Testing Indefinite-Lived Intangible Assets for Impairment* (ASU 2012-02), to allow entities to use a qualitative approach to test indefinite-lived intangible assets for impairment. ASU 2012-02 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed quantitative impairment test by comparing the fair value of the indefinite-lived intangible asset with its carrying value. ASU 2012-02 is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012 and early adoption is permitted. The Company is currently evaluating the impact of the adoption of ASU 2012-02 on the consolidated financial statements.

[Table of Contents](#)

Revenues

The following table presents the Company's revenues, by revenue source, for the periods presented (in thousands):

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Partner and Other Revenue Sources	\$ 91,881	\$ 95,330	\$34,820	\$32,795
Proprietary Web site Traffic Sources	15,822	8,986	5,042	2,027
Total Revenue	<u>\$107,703</u>	<u>\$104,316</u>	<u>\$39,862</u>	<u>\$34,822</u>

The Company's partner network revenues are primarily generated using third-party distribution networks to deliver the advertisers' listings. The distribution network includes mobile and online search engines and applications, directories, destination sites, shopping engines, third-party Internet domains or web sites, other targeted Web-based content, mobile carriers and other offline sources. The Company generates revenue upon delivery of qualified and reported phone calls or click-throughs to our advertisers or to advertising services providers' listings. The Company pays a revenue share to the distribution partners to access their mobile, online, offline and other user traffic. Other revenues include the Company's call provisioning and call tracking services, presence management services, campaign management services and natural search optimization services.

The Company's proprietary web site traffic revenues are generated from the Company's portfolio of owned web sites which are monetized with pay-for-call or pay-per-click listings that are relevant to the web sites, as well as other forms of advertising, including banner advertising and sponsorships. When an online user navigates to one of the Company's owned and operated web sites and calls or clicks on a particular listing or completes the specified action, the Company receives a fee.

(3) Stock-based Compensation Plans

The Company accounts for stock-based compensation for employees and non-employees under the fair value method.

Stock-based compensation expense was included in the following operating expense categories as follows (in thousands):

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Service costs	\$ 924	\$ 1,178	\$ 325	\$ 419
Sales and marketing	1,101	2,353	461	278
Product development	1,174	779	470	176
General and administrative	8,210	8,129	2,696	2,842
Total stock-based compensation	<u>\$11,409</u>	<u>\$12,439</u>	<u>\$3,952</u>	<u>\$ 3,715</u>
Income tax benefit related to stock-based compensation included in net income (loss)	<u>\$ 3,989</u>	<u>\$ 3,750</u>	<u>\$1,800</u>	<u>\$ 1,088</u>

[Table of Contents](#)

The per share fair value of time-vested stock options granted during the three and nine months ended September 30, 2011 and 2012 was determined on the date of grant using the Black-Scholes option-pricing model. The following weighted average assumptions were used in determining the fair value of time-vested stock option grants for the periods presented:

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Expected life (in years)	4.0	4.0-6.25	4.0	4.0
Risk-free interest rate	1.33%	0.60%	0.69%	0.47%
Expected volatility	69%	70%	70%	69%
Expected dividend yield	0.91%	2.00%	0.91%	3.11%

Stock option activity during the nine months ended September 30, 2012 is summarized as follows:

	Shares	Weighted average exercise price	Weighted average remaining contractual term (in years)	Aggregate intrinsic value
Balance at December 31, 2011	7,203,784	\$ 8.24	6.81	\$ 5,971
Options granted	310,400	3.88		
Options forfeited	(500,205)	7.10		
Options expired	(367,157)	11.28		
Options exercised	(6,556)	4.13		
Balance at September 30, 2012	<u>6,640,266</u>	<u>\$ 7.96</u>	<u>6.35</u>	<u>\$ 332</u>

The Company issues restricted stock to employees for future services and in connection with acquisitions. Restricted stock award grants are generally measured at fair value on the date of grant based on the number of awards granted and the quoted price of the Company's common stock. Restricted shares issued are accounted for under FASB ASC 718 using the straight-line method net of estimated forfeitures.

The Company issues restricted stock units which entitle the holder to receive one share of the Company's Class B common stock upon satisfaction of a combination of certain service and market conditions. No restricted stock units were granted during the nine months ended September 30, 2011 and 2012 that have vesting based on a combination of certain service and market conditions.

Restricted stock awards and restricted stock units activity during the nine months ended September 30, 2012 is summarized as follows:

	Shares	Weighted average grant date fair value
Unvested balance at December 31, 2011	4,289,024	\$ 8.23
Granted	923,250	3.62
Vested	(920,431)	6.14
Forfeited	(516,278)	7.57
Unvested balance at September 30, 2012	<u>3,775,565</u>	<u>\$ 7.70</u>

In the second quarter of 2012 vesting of approximately 195,000 restricted shares were fully accelerated in connection with a separation agreement.

In the third quarter of 2012, the Company repurchased 6,900 shares from certain executives for minimum withholding taxes on 26,000 restricted stock award vests. The number of shares repurchased was based on the value on the vesting date of the restricted stock awards equivalent to the value of the executives' minimum withholding taxes of \$24,000. The Company then remitted cash to the appropriate taxing authorities. The payments are reflected as a financing activity within the condensed consolidated statement of cash flows. The payments had the effect of share repurchases by the Company as they reduced the number of shares that would have otherwise been issued on the vesting date and were recorded as a reduction of additional paid in capital.

(4) Net Income (Loss) Per Share

We compute net income (loss) per share of Class A and Class B common stock using the two class method. Under the provisions of the two class method, basic net income (loss) per share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of common and dilutive common equivalent shares outstanding during the period. The computation of the diluted net income (loss) per share of Class B common stock assumes the conversion of Class A common stock to Class B common stock, while the diluted net income (loss) per share of Class A common stock does not assume the conversion of those shares.

In accordance with the two class method, the undistributed earnings for each period are allocated based on the contractual participation rights of the Class A and Class B common shares and the restricted shares as if the earnings for the period had been distributed. Considering the terms of the Company's charter which provides that, if and when dividends are declared on our common stock in accordance with Delaware General Corporation Law, equivalent dividends shall be paid with respect to the shares of Class A common stock and Class B common stock and that both classes of common stock have identical dividend rights and would share equally in our net assets in the event of liquidation, we have allocated undistributed losses on a proportionate basis. Additionally, the Company has paid dividends equally to both classes of common stock and the unvested restricted shares since it initiated a quarterly cash dividend in November 2006.

Instruments granted in unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents, whether paid or unpaid, are participating securities prior to vesting. As such, the Company's restricted stock awards are considered participating securities for purposes of calculating earnings per share. Under the two class method, dividends paid on unvested restricted stock are allocated to these participating securities and therefore impacts the calculation of amounts allocated to common stock.

Net income (loss) applicable to common stockholders	\$ 325	\$ 1,187	\$ (187)	\$ (666)
Denominator:				
Weighted average number of shares outstanding used to calculate basic net income (loss) per share	9,851	23,673	9,570	24,536
Weighted average stock options and warrants and common shares subject to repurchase or cancellation	—	2,420	—	—
Conversion of Class A to Class B common shares outstanding	—	9,851	—	9,570
Weighted average number of shares outstanding used to calculate diluted net income (loss) per share	<u>9,851</u>	<u>35,944</u>	<u>9,570</u>	<u>34,106</u>
Diluted net income (loss) per share applicable to common stockholders	\$ 0.03	\$ 0.03	\$ (0.02)	\$ (0.02)

The weighted average number of shares used to calculate the diluted net income (loss) per share includes the weighted average number of shares from the assumed conversion of Class A common stock to Class B common stock.

[Table of Contents](#)

The computation of diluted net income (loss) per share excludes the following because their effect would be anti-dilutive (in thousands):

- For the three and nine months ended September 30, 2011, outstanding options to acquire 3,312 and 3,466 shares of Class B common stock, respectively. For the three and nine months ended September 30, 2012, outstanding options to acquire 6,640 shares of Class B common stock.
- For the three and nine months ended September 30, 2011, 3,489 shares of unvested Class B restricted common shares issued to employees and in connection with acquisitions. For the three and nine months ended September 30, 2012, 3,566 shares of unvested Class B restricted common shares issued to employees and in connection with acquisitions.
- For the three and nine months ended September 30, 2011, 49 restricted stock units with vesting based on satisfaction of certain service and market conditions. For the three and nine months ended September 30, 2012, 209 restricted stock units with vesting based on satisfaction of certain service and market conditions.
- For the three and nine months ended September 30, 2011 and 2012, 4,402 and 4,907 shares of Class B common stock, respectively, that may be issued in lieu of cash for the deferred payments related to the acquisition of Jingle using the "if converted" method. See Note 16 for further discussion.

(5) Concentrations

The Company maintains substantially all of its cash and cash equivalents with one financial institution and are all considered at Level 1 fair value with observable inputs that reflect quoted prices for identical assets or liabilities in active markets.

A significant majority of the Company's revenue earned from advertisers is generated through arrangements with distribution partners. The Company may not be successful in renewing any of these agreements, or if they are renewed, they may not be on terms as favorable as current agreements. The Company may not be successful in entering into agreements with new distribution partners or advertisers on commercially acceptable terms. In addition, several of these distribution partners or advertisers may be considered potential competitors.

There were no distribution partners representing more than 10% of consolidated revenue for the three and nine months ended September 30, 2011 and 2012.

The advertisers representing more than 10% of consolidated revenue are as follows:

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Advertiser A	30%	27%	31%	26%

Advertiser A is also a distribution partner.

The outstanding receivable balance for each advertiser representing more than 10% of accounts receivable is as follows:

	At December 31, 2011	At September 30, 2012
Advertiser A	37%	32%
Advertiser B	*	13%

* Less than 10% of accounts receivable.

(6) Segment Reporting and Geographic Information

Operating segments are revenue-producing components of the enterprise for which separate financial information is produced internally for the Company's management. For all periods presented the Company operated as a single segment, principally in domestic markets providing digital advertiser transaction services to enterprises.

Revenues from advertisers by geographical areas are tracked on the basis of the location of the advertiser. The vast majority of the Company's revenue and accounts receivable are derived from domestic sales to advertisers engaged in various mobile, online and other digital activities.

[Table of Contents](#)

Revenues by geographic region are as follows (in percentages):

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
United States	94%	94%	95%	93%
Canada	5%	6%	5%	7%
Other countries	*	*	*	*
	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

* Less than 1% of revenue.

(7) Property and Equipment

Property and equipment consisted of the following (in thousands):

	At December 31, 2011	At September 30, 2012
Computer and other related equipment	\$ 13,671	\$ 15,321
Purchased and internally developed software	6,667	7,373
Furniture and fixtures	1,229	1,232
Leasehold improvements	1,805	1,809
	<u>\$ 23,372</u>	<u>\$ 25,735</u>
Less: accumulated depreciation and amortization	(17,185)	(19,531)
Property and equipment, net	<u>\$ 6,187</u>	<u>\$ 6,204</u>

The Company has capitalized certain costs of internally developed software for internal use. The estimated useful life of costs capitalized is evaluated for each specific project. Amortization begins in the period in which the software is ready for its intended use.

Depreciation and amortization expense, related to property and equipment was approximately \$698,000 and \$823,000 for the three months ended September 30, 2011 and 2012, respectively and was \$2.1 million and \$2.3 million for the nine months ended September 30, 2011 and 2012, respectively.

(8) Commitments

The Company has commitments for future payments related to office facilities leases and other contractual obligations. The Company leases its office facilities under operating lease agreements expiring through 2018. Certain of these lease agreements have free or escalating rent payment provisions or fund certain leasehold improvements which the Company accounts for as a lease incentive. The Company recognizes rent expense under such agreements on a straight-line basis over the lease term with any lease incentive amortized as a reduction of rent expense over the lease term. The Company also has other contractual obligations expiring over varying time periods through 2016. Other contractual obligations primarily relate to minimum contractual payments due to distribution partners and other outside service providers (in thousands).

	Facilities operating leases	Other contractual obligations	Total
2012	\$ 536	\$ 1,206	\$ 1,742
2013	2,235	2,050	4,285
2014	2,288	1,131	3,419
2015	2,226	639	2,865
2016	2,266	447	2,713
2017 and after	2,910	—	2,910
Total minimum payments	<u>\$12,461</u>	<u>\$ 5,473</u>	<u>\$17,934</u>

Rent expense incurred by the Company was approximately \$547,000 and \$488,000 for the three months ended September 30, 2011 and 2012, respectively, and was \$1.6 million and \$1.5 million for the nine months ended September 30, 2011 and 2012, respectively.

(9) Credit Agreement

In April 2008, the Company entered into a credit agreement providing for a senior secured \$30 million revolving credit facility (“Credit Agreement”). During the first quarter of 2011, the Company signed an amendment to the Credit Agreement which extended the maturity period through to April 1, 2014. Interest on outstanding balances under the Credit Agreement will accrue at LIBOR plus an applicable margin rate, as determined under the agreement and has an unused commitment fee. The Credit Agreement contains certain customary representations and warranties, financial covenants, events of default and is secured by substantially all of the assets of the Company. During the nine months ended September 30, 2011 and 2012, the Company had no borrowings under the Credit Agreement.

(10) Contingencies and Taxes

(a) Contingencies

The Company is involved in legal and administrative proceedings and claims of various types from time to time. While any litigation contains an element of uncertainty, the Company is not aware of any legal proceedings or claims which are pending that the Company believes, based on current knowledge, will have, individually or taken together, a material adverse effect on the Company’s financial condition or results of operations or liquidity.

In some agreements to which we are a party, we have agreed to indemnification provisions of varying scope and terms with advertisers, vendors and other parties with respect to certain matters, including, but not limited to, losses arising out of the Company’s breach of agreements or representations and warranties made by the Company, services to be provided by the Company and intellectual property infringement claims made by third parties. As a result of these provisions, we may from time to time provide certain levels of financial support to our contract parties to seek to minimize the impact of any associated litigation in which they may be involved. To date, there have been no known events or circumstances that have resulted in any material costs related to these indemnification provisions and no liabilities therefore have been recorded in the accompanying unaudited condensed consolidated financial statements. However, the maximum potential amount of the future payments we could be required to make under these indemnification provisions could be material.

(b) Taxes

From time to time, various state, federal and other jurisdictional tax authorities undertake audits of the Company and its filings. In evaluating the exposure associated with various tax filing positions, the Company on occasion accrues charges for uncertain positions. The Company adjusts these contingencies in light of changing facts and circumstances, such as the outcome of tax audits. Audits of the Company’s federal tax returns for 2005 through 2007 were concluded in the first quarter of 2011 which resulted in certain tax adjustments. In connection with these tax adjustments, the Company reduced its gross tax contingencies by \$285,000 and recognized \$181,000 of tax benefit in the first quarter of 2011. The Company does not have any significant interest or penalty accruals. The provision for income taxes includes the impact of contingency provisions and changes to contingencies that are considered appropriate. The Company files U.S. federal, certain U.S. states, and certain foreign tax returns. Generally, U.S. federal, U.S. state, and foreign tax returns filed for years after 2005 are within the statute of limitations and are under examination or may be subject to examination.

[Table of Contents](#)

(11) Intangible Assets from Acquisitions

Intangible assets from acquisitions consisted of the following (in thousands):

	As of December 31, 2011		
	Gross Carrying Amount	Accumulated Amortization(1)	Net
Advertiser relationship	\$ 3,070	\$ (897)	\$2,173
Patents	318	(232)	86
Distribution partner relationship	4,830	(1,177)	3,653
Non-compete agreements	58	(43)	15
Trademarks/domains	40,539	(40,130)	409
Acquired technology	2,760	(1,008)	1,752
	<u>\$ 51,575</u>	<u>\$ (43,487)</u>	<u>\$8,088</u>

	As of September 30, 2012		
	Gross Carrying Amount	Accumulated Amortization(1)	Net
Advertiser relationship	\$ 3,070	\$ (1,818)	\$1,252
Distribution partner relationship	4,830	(2,384)	2,446
Acquired technology	2,760	(2,044)	716
	<u>\$ 10,660</u>	<u>\$ (6,246)</u>	<u>\$4,414</u>

- (1) Excludes the original cost and accumulated amortization of fully-amortized intangible assets which were \$42.6 million and \$82.2 million at December 31, 2011 and September 30, 2012, respectively.

Amortizable intangible assets are amortized on a straight-line basis over their useful lives. Amortization expense incurred by the Company was approximately \$1.7 million and \$1.1 million for the three months ended September 30, 2011 and 2012, respectively, and was \$3.8 million and \$3.7 million for the nine months ended September 30, 2011 and 2012, respectively. Based upon the current amount of intangible assets subject to amortization, the estimated amortization expense for the next five years is as follows: \$1.1 million for the remainder of 2012, \$2.9 million in 2013, \$433,000 in 2014 and \$0 thereafter.

(12) Goodwill

Changes in the carrying amount of goodwill for the nine months ended September, 2012 are as follows (in thousands):

Balance as of December 31, 2011	\$ 82,644
Jingle acquisition	(53)
Other	(28)
Balance as of September 30, 2012	<u>\$ 82,563</u>

Goodwill is tested annually for impairment and is tested for impairment more frequently if events and circumstances indicate that the asset is more likely than not impaired. Events and circumstances considered in determining whether the carrying value of goodwill may be impaired include, but are not limited to, significant changes in performance relative to expected operating results, significant changes in the use of the assets, significant negative industry or economic trends, or a significant decline in the Company's stock price and/or market capitalization for a sustained period of time.

At various points in time during the nine months ended September 30, 2012, the Company's stock price approached and traded below the then book value per share. If the Company's stock price were to trade below the book value per share for an extended period of time and/or the Company experiences changes in its business, including changes in projected earnings and cash flows, the Company may have to recognize an impairment of all or some portion of goodwill.

The current business environment is subject to evolving market conditions and requires significant management judgment to interpret the potential impact to our assumptions. To the extent that changes in the current business environment impact the Company's ability to achieve levels of forecasted operating results and cash flows, or should other events occur indicating the remaining carrying value of its assets might be impaired, the Company would test its goodwill and intangible assets for impairment and may recognize an additional impairment loss to the extent that the carrying amount exceeds such asset's fair value. The Company will continue to monitor its financial performance, stock price and other factors in order to determine if there are any indicators of impairment prior to its annual impairment evaluation in the fourth quarter of 2012.

(13) Intangible and other assets, net

Intangible and other assets, net consisted of the following (in thousands):

	At December 31, 2011	At September 30, 2012
Internet domain names	\$ 15,256	\$ 14,876
Less accumulated amortization	(14,535)	(14,513)
Internet domain names, net	721	363
Registration fees, net	1,142	165
Other	328	279
Total intangibles and other assets, net	<u>\$ 2,191</u>	<u>\$ 807</u>

The Company capitalizes costs incurred to acquire domain names or URLs, which include the initial registration fees, to other intangible assets which excludes intangible assets acquired through business combinations. The capitalized costs are amortized over the expected useful life of the domain names on a straight-line basis.

The Company also capitalizes costs incurred to renew or extend the term of the domain names or URLs to prepaid expenses and other current assets or registration fees, net. The capitalized costs are amortized over the renewal or extended period on a straight-line basis. The total amount of costs incurred for the three and nine months ended September 30, 2012 to renew or extend the term for domain names was \$91,000 and \$2.3 million, respectively. The weighted average renewal period for registration fees as of September 30, 2012 was approximately one year.

Amortization expense for internet domain names was approximately \$274,000 and \$76,000 for the three months ended September 30, 2011 and 2012, respectively, and was \$886,000 and \$443,000 for the nine months ended September 30, 2011 and 2012, respectively. Based upon the current amount of domains subject to amortization, the estimated expense for the next five years is as follows: \$102,000 for the remainder of 2012, \$221,000 in 2013, \$40,000 in 2014, and \$0 thereafter.

(14) Common Stock

In July 2012, the Company's board of directors declared a regular quarterly dividend in the amount of \$0.02 per share on the Company's Class A and Class B common stock. The Company paid these dividends on August 15, 2012 to the holders of record as of the close of business on August 3, 2012. The Company paid approximately \$753,000 for these quarterly dividends.

In August 2012, the Company's board of directors approved an increase to the Company's quarterly cash dividend on the Company's Class A and Class B common stock, subject to capital availability, from \$0.02 per share to \$0.035 per share. The increase in the dividend raises the annual dividend rate to \$0.14 per share or \$5.3 million. The Company paid the incremental \$0.015 per share dividends on August 31, 2012 to Class A and Class B common stockholders of record as of the close of business on August 16, 2012. The Company paid approximately \$565,000 for these incremental dividends.

In November 2006, the Company's board of directors authorized a share repurchase program for the Company as well as the initiation of a quarterly cash dividend for the holders of the Class A and Class B common stock. The Company's board of directors have authorized increases to the share repurchase program for the Company to repurchase up to 13 million shares in the aggregate (less shares previously repurchased under the share repurchase program) of the Company's Class B common stock. Under the share repurchase program, repurchases may take place in the open market and in privately negotiated transactions and at times and in such amounts as the Company deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, capital availability, and other market conditions. This stock repurchase program does not have an expiration date and may be expanded, limited or terminated at any time without prior notice.

During the nine months ended September 30, 2012, the Company repurchased 365,000 shares of Class B common stock for approximately \$1.6 million at an average stock price of \$4.29 per share. The 365,000 shares have been recorded as treasury stock in the condensed consolidated balance sheet as of September 30, 2012.

During the nine months ended September 30, 2012, the Company's board of directors approved the retirement of approximately 1.0 million shares of treasury stock. The excess of purchase price over par value of \$2.6 million was recorded as a deduction to additional paid in capital on the condensed consolidated balance sheet.

[Table of Contents](#)

(15) Acquisition

On April 7, 2011, the Company acquired 100% of the stock of Jingle Networks, Inc. (“Jingle”), a provider of mobile voice search performance advertising and technology solutions in North America for the following consideration:

- Approximately \$15.8 million in cash, net of cash acquired, and 1,019,103 shares of the Company’s Class B common stock paid at closing; and
- Future consideration of (i) \$17.6 million, net of certain working capital adjustments, on the first annual anniversary of the closing, and (ii) \$18.0 million on the 18th month anniversary of closing, with the future consideration payable in either cash or shares of the Company’s Class B common stock or some combination to be determined by the Company. Any shares issued in payment of the future consideration will be increased by 5%. The future consideration is recorded as current deferred acquisition payments in the balance sheet. In April 2012, the Company paid approximately \$16.9 million in cash, net of certain working capital and other adjustments, on the first anniversary of closing. In October 2012, the Company paid approximately \$17.9 million in cash, net of adjustments, on the 18th month anniversary of closing.
- Following the closing, the Company issued 462,247 shares of restricted stock at an aggregate value of approximately \$3.3 million to employees of Jingle, subject to vesting for up to four years.

The Company accounted for the Jingle acquisition as a business combination. As a result of the acquisition, the Company added additional sources of mobile distribution to its digital call advertising network. The Company has integrated Jingle’s operations, including sales activities, and accordingly, revenues and earnings of the acquired operations are not readily separable.

The fair value of the shares of Class B common stock issued as part of the consideration paid was valued at \$7.6 million using the Company’s closing stock price of \$7.46 per share at the acquisition date. The fair value of the future consideration payments of \$34.7 million was discounted using a rate of approximately 2% based on the Company’s incremental borrowing rate and is recorded on the balance sheet as deferred acquisition payments.

During the three months ended December 31, 2011, the Company recorded approximately \$372,000 for the future obligations of a non-cancelable lease and other costs related to the Jingle office in acquisition related costs. The portion related to the non-cancelable lease was based on estimates of vacancy period and sublease income. In March 2012, the Company arranged for the future sublease of the Jingle office space and revised its original estimates which resulted in a \$132,000 benefit recorded in acquisition related costs in the condensed consolidated statement of operations. The actual vacancy periods may differ from these estimates, and sublease income, if any, may not materialize. Accordingly, these estimates may be adjusted in future periods.

In connection with the acquisition, the Company acquired federal net operating loss (“NOL”) carryforwards. Where there is a “change in ownership” within the meaning of Section 382 of the Internal Revenue Code, the acquired federal NOL carryforwards are subject to an annual limitation. The Company believes that such an ownership change had occurred at Jingle, and that the utilization of the carryforwards is limited such that the majority of the NOL carryforwards will never be utilized. Accordingly, the Company has not recorded those amounts the Company believes it will not be able to utilize and has not included those NOL carryforwards and research and development credit carryforwards in its deferred tax assets. The Company’s estimate of NOL carryforwards that may be utilized was approximately \$7.0 million. A deferred tax asset relating to these NOL carryforwards was recorded during the three months ended December 31, 2011 with a corresponding adjustment to goodwill of approximately \$2.4 million.

A summary of the consideration for the acquisition is as follows (in thousands):

Cash	\$16,563
Stock issued	7,603
Future consideration	34,695
Total	<u>\$58,861</u>

The following summarizes the allocation of the fair value of the assets acquired and the liabilities assumed (in thousands):

Cash acquired	\$ 761
Accounts receivable	4,740
Current assets	2,538
Deferred tax assets	62
Property and equipment	206
Other non-current assets	148
Intangible assets	11,966
Goodwill	47,290
Total assets acquired	67,711
Current liabilities	(5,512)
Non-current deferred tax liabilities	(3,246)
Other non-current liabilities	(92)
Total liabilities assumed	<u>(8,850)</u>
Net assets acquired	<u>\$58,861</u>

[Table of Contents](#)

The acquired intangible assets of approximately \$12.0 million consist primarily of customer and partner relationships, technology, trademarks and patents which will be amortized over 12 to 36 months (weighted average of 2.4 years) using the straight line method. The goodwill and acquired intangible assets will not be deductible for federal tax purposes.

The following unaudited pro forma financial information summarizes the combined results of operations of the Company and Jingle and is based on the historical results of operations of the Company and Jingle. The pro forma information reflects the results of operations of the Company as if the acquisition of Jingle had taken place on January 1, 2010. The unaudited pro forma financial information for the three and nine months ended September 30, 2011 includes the combined historical results of operations for the Company for the three and nine months ended September 30, 2011 and Jingle's historical results of operations during the pre-acquisition period from January 1, 2011 through April 7, 2011. The unaudited pro forma financial information for the three and nine months ended September 30, 2012 includes the historical results of operations for the Company for the three and nine months ended September 30, 2012. The pro forma information includes adjustments for amortization of intangible assets, intercompany activity and accretion of interest expense related to the future consideration. The unaudited pro forma financial information is provided for information purposes only and is not necessarily indicative of the combined results that would have occurred had the acquisition taken place on the dates indicated, nor is it necessarily indicative of results that may occur in the future.

(in thousands)	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Revenue	\$113,494	\$104,316	\$39,862	\$34,822
Net income (loss)	509	495	1,569	(52)
Net income (loss) applicable to common stockholders	318	233	1,502	(175)

(16) Subsequent Events

In October 2012, the Company's board of directors declared a regular quarterly dividend in the amount of \$0.035 per share on the Company's Class A and Class B common stock. The Company will pay these dividends on November 15, 2012 to the holders of record as of the close of business on November 2, 2012. The Company expects to pay approximately \$1.3 million for these quarterly dividends.

On November 1, 2012, the Company announced that its board of directors has authorized the Company to pursue the separation of its business into two distinct publicly traded entities. The separation is expected to be a tax-free pro rata distribution in which the Company's existing shareholders would hold interests in: (1) Marchex, a mobile advertising company focused on calls, and (2) Archeo, Inc. ("Archeo"), a domain and advertising marketplace. Completion of the proposed separation is subject to certain conditions, including final approval by the Company's board of directors, receipt of regulatory approvals, favorable tax rulings and/or opinions regarding the tax-free nature of the transaction to the Company and to its shareholders, further due diligence as appropriate, and the filing and effectiveness of appropriate filings with the Securities and Exchange Commission.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We use words such as "believes", "intends", "expects", "anticipates", "plans", "may", "will" and similar expressions to identify forward-looking statements. All forward-looking statements, including, but not limited to, statements regarding our future operating results, financial position, prospects, acquisitions and business strategy, expectations regarding our growth and the growth of the industry in which we operate, and plans and objectives of management for future operations, are inherently uncertain as they are based on our expectations and

[Table of Contents](#)

assumptions concerning future events. In addition, there are certain risks and uncertainties relating to our proposed separation transaction which contemplates a separation of our mobile and call advertising business and our domain and advertising marketplace business, including, but not limited to, the impact and possible disruption to our operations, the timing and certainty of completing the transaction, the high costs in connection with the spin-off which we would not be able to recoup if the spin-off is not consummated, the expectation that the spin-off will be tax-free, revenue and growth expectations for the two independent companies following the spin-off, unanticipated developments that may delay or negatively impact the spin-off, and the ability of each business to operate as an independent entity upon completion of the spin-off. Any or all of our forward-looking statements in this report may turn out to be inaccurate. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. They may be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties, including but not limited to the risks, uncertainties and assumptions described in this report, in Part II, Item 1A. under the caption "Risk Factors" and elsewhere in this report and in our Annual Report on Form 10-K for the year ended December 31, 2011 and those described from time to time in our future reports filed with the SEC. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this report may not occur as contemplated, and actual results could differ materially from those anticipated or implied by the forward-looking statements. All forward-looking statements in this report are made as of the date hereof, based on information available to us as of the date hereof, and we assume no obligation to update any forward-looking statement.

The following discussion and analysis provides information that we believe is relevant to an assessment and understanding of our results of operation and financial condition. You should read this analysis in conjunction with the attached condensed consolidated financial statements and related notes thereto, and with our audited consolidated financial statements and the notes thereto, included in our Annual Report on Form 10-K for the year ended December 31, 2011.

Overview

We are a mobile and call advertising company that drives consumers to connect with businesses over the phone and provides in-depth analysis of those connections. We also provide performance-based online advertising that connects advertisers with consumers across our owned web sites as well as third party web sites.

Our technology-based products and services facilitate the efficient and cost-effective marketing and selling of goods and services for small and national advertisers who want to market and sell their products through mobile, online and offline; and a proprietary, locally-focused web site network where we help consumers find local information, as well as fulfill our advertiser marketing campaigns:

- **Digital Call Advertising Services.** We deliver a variety of digital call advertising products and services to national advertisers, advertising agencies and small advertiser reseller partners. These services include pay-for-call through the Digital Call Marketplace, and Marchex Call Analytics, which include phone number and call tracking, call mining, keyword-level tracking, click-to-call, web site proxying, and other call-based products which enable our customers to utilize mobile, online and offline advertising to drive calls as well as clicks into their businesses and to measure the effectiveness of their advertising campaigns. Advertisers pay us a fee for each call they receive from call-based ads we distribute through our sources of call distribution or for each phone number tracked based on a pre-negotiated rate.
- **Local Leads.** Our Local Leads platform, a white-labeled, full service digital advertising solution for small business resellers, such as Yellow Pages providers and vertical marketing service providers, to sell digital call advertising and/or search marketing and other lead products through their existing sales channels to their small business advertisers, which are then fulfilled by us across our distribution network, including mobile sources, and leading search engines. By creating a solution for companies who have relationships with small businesses, it is easier for these small businesses to participate in mobile, online, and offline call advertising. The lead services we offer to small business advertisers through our Local Leads platform include products typically available only to national advertisers, including pay-for-call, call tracking, presence management ad creation, keyword selection, geo-targeting, advertising campaign management, reporting, and analytics. The Local Leads platform has the capacity to support hundreds of thousands of advertiser accounts. Reseller partners and publishers generally pay us account fees and agency fees for our products in the form of a percentage of the cost of every click or call delivered to their advertisers. Through our contract with Yellowpages.com LLC d/b/a AT&T Interactive which is a subsidiary of AT&T (collectively, "AT&T"), Our arrangement with AT&T relates to a business unit that is included in a newly formed unit called YP Holdings, LLC ("YP") that AT&T recently sold a majority stake in to a private equity third party. YP is our largest reseller partner and was responsible for 26% and 27% of our total revenues for both the three and nine months ended September 30, 2012, respectively, of which the majority is derived from our local leads platform.
- **Pay-Per-Click Advertising.** We deliver pay-per-click advertisements to online users in response to their keyword search queries or on pages they visit throughout our distribution network of search engines, shopping engines, certain third party vertical and local web sites, mobile distribution and our own Publishing Network. In addition to distributing their ads, we offer account management services to help our advertisers optimize their pay-per-click campaigns, including editorial and keyword selection recommendations and report analysis. The pay-per-click advertisements are generally ordered based on the amount our advertisers choose to pay for a placement and the relevancy of their ads to the keyword search. Advertisers pay us when a user clicks on their advertisements in our distribution network and we pay publishers or distribution partners a percentage of the revenue generated by the click-throughs on their site(s). In addition, we generate revenue from cost-per-action events that take place on our distribution network. Cost-per-action revenue occurs when the user is

[Table of Contents](#)

redirected from one of our web sites or a third party web site in our distribution network to an advertiser's web site and completes a specified action. We also offer a private-label platform for publishers, separate and distinct from our local leads platform which enables them to monetize their web sites with contextual advertising from their own customers or from our advertising relationships. We sell pay-per-click contextual advertising placements on specialized vertical and branded publisher web sites on a pay-per-click basis. Advertisers can target the placements by category, site- or page-specific basis. We believe our site- and page-specific approach provides publishers with an opportunity to generate revenue from their traffic while protecting their brand. Our approach gives advertisers greater transparency into the source of the traffic and relevancy for their ads and enables them to optimize the return on investment from their advertising campaign. The contextual advertisement placements are generally ordered based on the amount our advertisers choose to pay for a placement and the relevance of the advertisement, based on historic click-through rates. Advertisers pay us when a user clicks on their advertisements in our network and we pay publishers a percentage of the revenue generated by the click-throughs on their site.

- **Proprietary Web Site Traffic.** Our Proprietary Web Site Traffic is comprised of more than 200,000 of our owned and operated web sites focused on helping users make informed decisions about where to get local products and services. The more than 200,000 web sites in our network include more than 75,000 U.S. ZIP code sites, including 98102.com and 90210.com, covering ZIP code areas nationwide, as well as commercial verticals like local, business and finance, professional services, directory and reference, entertainment, electronics and technology, education, shopping, health, and auto. Traffic to our proprietary web sites is primarily monetized with advertiser listings that are relevant to the web sites, as well as other forms of advertising, including banner advertising.

We were incorporated in Delaware on January 17, 2003. Acquisition initiatives have played an important part in our corporate history to date.

We currently have offices in Seattle, Washington; Las Vegas, Nevada, and New York, New York.

Proposed Separation

On November 1, 2012, the Company announced that its board of directors has authorized the Company to pursue the separation of its business into two distinct publicly traded entities. The separation is expected to be a tax-free pro rata distribution in which the Company's existing shareholders would hold interests in: (1) Marchex, a mobile advertising company focused on calls, and (2) Archeo, a domain and advertising marketplace. Completion of the proposed separation is subject to certain conditions, including final approval by the Company's board of directors, receipt of regulatory approvals, favorable tax rulings and/or opinions regarding the tax-free nature of the transaction to the Company and to its shareholder, further due diligence as appropriate, and the filing and effectiveness of appropriate filings with the Securities and Exchange Commission. While we expect to complete the separation by the end of the third calendar quarter of 2013, we cannot assure that the separation will be completed and if completed on the anticipated timeline or that the terms of the separation will not change. We are incurring costs in connection with the separation transaction and expect more costs through the separation date. We also expect there will be additional incremental costs as a result of the two publicly-traded companies functioning separately related to corporate finance, governance, public reporting and other expenses associated with being public companies. Thus our combined historical costs may not be indicative of the actual costs both companies will incur as independent publicly-traded companies in the future. See "Part II, Item 1A. Risk Factors" for certain risk factors relating to the proposed separation transaction. The disclosures within this Management's Discussion and Analysis of Financial Operations are on a consolidated Marchex, Inc. basis and do not take into account the proposed separation.

Consolidated Statements of Operations

All inter-company transactions and balances within Marchex have been eliminated in consolidation. Our purchase accounting resulted in all assets and liabilities from our acquisitions being recorded at their estimated fair values on the respective acquisition dates. All goodwill, intangible assets and liabilities resulting from the acquisitions have been recorded in our financial statements.

Presentation of Financial Reporting Periods

The comparative periods presented are for the three and nine months ended September 30, 2011 and 2012.

Revenue

We currently generate revenue through our digital call advertising services, pay-per-click advertising, and local leads platform which include our digital call and click services, and proprietary web site traffic.

Our primary sources of revenue are the performance-based advertising services, which include digital pay-for-call services, pay-per-click services, and cost-per-action services. These primary sources amounted to greater than 75% of our revenues in all periods presented. Our secondary sources of revenue are our local leads platform which enables partner resellers to sell digital call advertising and/or search marketing products, campaign management services, and natural search optimization services. These secondary sources amounted to less than 25% of our revenues in all periods presented. We have no barter transactions.

[Table of Contents](#)

We recognize revenue upon the completion of our performance obligation, provided that: (1) evidence of an arrangement exists; (2) the arrangement fee is fixed and determinable; and (3) collection is reasonably assured.

In certain cases, we record revenue based on available and reported preliminary information from third-parties. Collection on the related receivables may vary from reported information based upon third-party refinement of the estimated and reported amounts owing that occurs subsequent to period ends.

Performance-Based Advertising Services

In providing digital call advertising services and pay-per-click advertising, we generate revenue upon our delivery of qualified and reported phone calls or click-throughs to our advertisers or advertising service providers' listings. These advertisers and advertising service providers pay us a designated transaction fee for each phone call or click-through, which occurs when a user makes a phone call or clicks on any of their advertisement listings after it has been placed by us or by our distribution partners. Each phone call or click-through on an advertisement listing represents a completed transaction. The advertisement listings are displayed within our distribution network, which includes mobile and online search engines and applications, directories, destination sites, shopping engines, third party Internet domains or web sites, our portfolio of owned web sites, other targeted Web-based content and offline sources. We also generate revenue from cost-per-action services, which occurs when the online user is redirected from one of our web sites or a third party web site in our distribution network to an advertiser web site and completes the specified action.

We generate revenue from reseller partners and publishers utilizing our local leads platform to sell digital call advertising and/or search marketing products. We are paid account fees and also agency fees for our products in the form of a percentage of the cost of every call or click delivered to advertisers. The reseller partners or publishers engage the advertisers and are the primary obligor, and we, in certain instances, are only financially liable to the publishers in our capacity as a collection agency for the amount collected from the advertisers. We recognize revenue for these fees under the net revenue recognition method. In limited arrangements resellers pay us a fee for fulfilling an advertiser's campaign in our distribution network and we act as the primary obligor. We recognize revenue for these fees under the gross revenue recognition method.

In providing pay-per-click contextual targeting services, advertisers purchase keywords or keyword strings, based on an amount they choose for a targeted placement on vertically-focused web sites or specific pages of a web site that are specific to their products or services and their marketing objectives. The contextual results distributed by our services are prioritized for users by the amount the advertiser is willing to pay each time a user clicks on the merchant's advertisement and the relevance of the merchant's advertisement, which is dictated by historical click-through rates. Advertisers pay us when a click-through occurs on their advertisement.

Search Marketing Services

Advertisers pay us additional fees for services such as campaign management and natural search engine optimization. Advertisers generally pay us on a click-through basis, although in certain cases we receive a fixed fee for delivery of these services. In some cases we also deliver banner campaigns for select advertisers. We may also charge initial set-up, account, service or inclusion fees as part of our services.

Banner advertising revenue may be based on a fixed fee per click and is generated and recognized on click-through activity. In other cases, banner payment terms are volume-based with revenue generated and recognized when impressions are delivered.

Non-refundable account set-up fees are paid by advertisers and are recognized ratably over the longer of the term of the contract or the average expected advertiser relationship period, which generally ranges from twelve months to more than two years. Other account and service fees are recognized in the month or period the account fee or services relate to.

Industry and Market Factors

We enter into agreements with various mobile, online and offline distribution partners to provide distribution for pay-for-call and pay-per-click advertisement listings which contain call tracking numbers and/or URL strings of our advertisers. We generally pay distribution partners based on a percentage of revenue or a fixed amount for each phone call or per click-through on these listings. The level of phone calls and click-throughs contributed by our distribution partners has varied, and we expect it will continue to vary, from quarter to quarter and year to year, sometimes significantly. If we do not add new distribution partners, renew our current distribution partner agreements, replace traffic lost from terminated distribution agreements with other sources or if our distribution partners' search businesses do not grow or are adversely affected, our revenue and results of operations may be materially and adversely affected. Our ability to grow will be impacted by our ability to increase our distribution, which impacts the number of mobile and Internet users who have access to our advertisers' listings and the rate at which our advertisers are able to convert calls and clicks from these mobile and Internet users into completed transactions, such as a purchase or sign up. Our ability to grow also depends on our ability to continue to increase the number of advertisers who use our services and the amount these advertisers spend on our services.

[Table of Contents](#)

We anticipate that these variables will fluctuate in the future, affecting our ability to grow and our financial results. In particular, it is difficult to project the number of phone calls or click-throughs we will deliver to our advertisers and how much advertisers will spend with us, and it is even more difficult to anticipate the average revenue per phone call or click-through. It is also difficult to anticipate the impact of worldwide economic conditions on advertising budgets, including due to the economic uncertainty resulting from recent disruptions in global financial markets.

In addition, we believe we will experience seasonality with our business. Our quarterly results have fluctuated in the past and may fluctuate in the future due to seasonal fluctuations in levels of mobile and Internet usage and seasonal purchasing cycles of many advertisers. Our experience has shown that during the spring and summer months, mobile and Internet usage is lower than during other times of the year and during the latter part of the fourth quarter of the calendar year we generally experience lower call volume and reduced demand for calls from our call advertising customers. The extent to which usage and call volume may decrease during these off-peak periods is difficult to predict. Prolonged or severe decreases in usage and call volume during these periods may adversely affect our growth rate and results. Additionally, the current business environment has generally resulted in advertisers and reseller partners reducing advertising and marketing services budgets or changing such budgets throughout the year, which we expect will impact our quarterly results of operations in addition to the typical seasonality seen in our industry.

In late October 2012, a tropical cyclone called Hurricane Sandy severely impacted portions of the Mid-Atlantic and Northeastern United States with lesser impacts in the Southeastern and Midwestern states. We experienced reduced call volume and telecommunication systems disruption as a result of the damage caused by Hurricane Sandy. Our proprietary systems and infrastructure, as well as our telecommunications facilities, have not experienced any direct damage. However, we have seen an impact from the significant cellular and telecommunications outages in the affected areas. We believe the communications infrastructure damage that is impacting cellular and telecommunications usage will create non-recurring impacts to our fourth quarter 2012 operating results. We cannot estimate the full impact but believe it will be short-term in nature.

Service Costs

Our service costs represent the cost of providing our performance-based advertising services and our search marketing services. The service costs that we have incurred in the periods presented primarily include:

- user acquisition costs;
- amortization of intangible assets;
- license and content fees;
- credit card processing fees;
- network operations;
- serving our search results;
- telecommunication costs, including the use of phone numbers relating to our call products and services;
- maintaining our Web sites;
- domain name registration renewal fees;
- network fees;
- fees paid to outside service providers;
- delivering customer service;
- depreciation of our Web sites, network equipment and internally developed software;
- colocation service charges of our communication and network equipment;
- bandwidth and software license fees;
- payroll and related expenses of related personnel; and
- stock-based compensation of related personnel.

[Table of Contents](#)

User Acquisition Costs

For the periods presented the largest component of our service costs consist of user acquisition costs that relate primarily to payments made to distribution partners for access to their online, mobile, offline, or other user traffic. We enter into agreements of varying durations with distribution partners that integrate our services into their Web sites and indexes. The primary economic structure of the distribution partner agreements is a variable payment based on a specified percentage of revenue. These variable payments are often subject to minimum payment amounts per phone call or click-through. Other payment structures that to a lesser degree exist include:

- fixed payments, based on a guaranteed minimum amount of usage delivered;
- variable payments based on a specified metric, such as number of paid phone calls or click-throughs; and
- a combination arrangement with both fixed and variable amounts that may be paid in advance.

We expense user acquisition costs based on whether the agreement provides for fixed or variable payments. Agreements with fixed payments with minimum guaranteed amounts of usage are expensed as the greater of the pro-rata amount over the term of arrangement or the actual usage delivered to date based on the contractual revenue share. Agreements with variable payments based on a percentage of revenue, number of paid phone calls, click-throughs, or other metrics are expensed as incurred based on the volume of the underlying activity or revenue multiplied by the agreed-upon price or rate.

Sales and Marketing

Sales and marketing expenses consist primarily of:

- payroll and related expenses for personnel engaged in marketing and sales functions;
- advertising and promotional expenditures including online and outside marketing activities;
- cost of systems used to sell to and serve advertisers; and
- stock-based compensation of related personnel.

Product Development

Product development costs consist primarily of expenses incurred in the research and development, creation and enhancement of our web sites and services.

Our research and development expenses include:

- payroll and related expenses for personnel;
- costs of computer hardware and software;
- costs incurred in developing features and functionality of the services we offer; and
- stock-based compensation of related personnel.

For the periods presented, substantially all of our product development expenses are research and development.

Product development costs are expensed as incurred or capitalized into property and equipment in accordance with FASB ASC 350. This statement requires that costs incurred in the preliminary project and post-implementation stages of an internal use software project be expensed as incurred and that certain costs incurred in the application development stage of a project be capitalized.

General and Administrative

General and administrative expenses consist primarily of:

- payroll and related expenses for executive and administrative personnel;
- professional services, including accounting, legal and insurance;
- bad debt provisions;
- facilities costs;
- other general corporate expenses; and
- stock-based compensation of related personnel.

Stock-Based Compensation

We account for stock-based compensation under the fair value method. As a result, stock-based compensation consists of the following:

- all share-based compensation arrangements granted after January 1, 2006 (adoption date of FASB ASC 718) and for any such arrangements that are modified, cancelled, or repurchased after that date, and
- the portion of previous share-based awards for which the requisite service has not been rendered as of January 1, 2006.

Stock-based compensation expense has been included in the same lines as compensation paid to the same employees in the consolidated statement of operations.

Amortization of Intangibles from Acquisitions

Amortization of intangible assets excluding goodwill relates to intangible assets identified in connection with our acquisitions.

The intangible assets have been identified as:

- non-competition agreements;
- trade and Internet domain names;
- distributor relationships;
- customer relationships;
- advertising relationships;
- patents; and
- acquired technology.

These assets are amortized over useful lives ranging from 12 to 84 months.

Provision for Income Taxes

We utilize the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax law is recognized in results of operations in the period that includes the enactment date.

Each reporting period we must assess the likelihood that our deferred tax assets will be recovered from existing deferred tax liabilities or future taxable income, and to the extent that realization is not more likely than not, a valuation allowance must be established. The establishment of a valuation allowance and increases to such an allowance may result in either increases to income tax expense or reduction of income tax benefit in the statement of operations. Although realization is not assured, we believe it is more likely than not, based on operating performance, existing corporate structure, existing deferred tax liabilities, projections of future taxable income and tax planning strategies, that our net deferred tax assets, excluding certain state, city, and foreign net operating loss carryforwards, will be realized. In determining that it was more likely than not that we would realize the deferred tax assets, factors considered included: historical taxable income, historical trends related to advertiser usage rates, projected revenues and expenses, macroeconomic conditions and issues facing our industry, existing contracts, our ability to project future results and any appreciation of our other assets. The majority of our deferred tax assets are from goodwill and intangible assets recorded in connection with various acquisitions that are tax-deductible over 15 year periods. Based on projections of future taxable income and tax planning strategies, we expect to be able to recover these assets. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if our projections of future taxable income are reduced or if we do not perform at the levels we are projecting, or if our proposed separation of Archeo impacts our evaluation of realizability of remaining deferred tax assets. This could result in increases to the valuation allowance for deferred tax assets and a corresponding increase to income tax expense of up to the entire net amount of deferred tax assets.

From time to time, various state, federal, and other jurisdictional tax authorities undertake reviews of us and our filings. We believe any adjustments that may ultimately be required as a result of any of these reviews will not be material to the financial statements.

As of September 30, 2012, we have net deferred tax assets of \$48.1 million, relating to the impairment of goodwill, amortization of intangibles assets, certain other temporary differences, acquired federal and state net operating loss carryforwards, and research and

[Table of Contents](#)

development credits. Although realization is not assured, we believe it is more likely than not that our net deferred tax assets, excluding certain state, city, and foreign net operating loss carryforwards, will be realized. As of September 30, 2012, based upon both positive and negative evidence available, we have determined it is not more likely than not that certain deferred tax assets primarily relating to net operating loss carryforwards in certain state, city, and foreign jurisdictions will be realizable and accordingly, have recorded a 100% valuation allowance of \$5.0 million against these deferred tax assets. We do not have a history of taxable income in the relevant jurisdictions and the state and foreign net operating loss carryforwards will more likely than not expire unutilized. Should we determine in the future that we will be able to realize these deferred tax assets, or not be able to realize all or part of our remaining net deferred tax assets recorded as of September 30, 2012, an adjustment to the net deferred tax assets would impact net income or stockholders' equity in the period such determination was made.

As of September 30, 2012, we had federal net operating loss carryforwards ("NOL") of \$1.7 million (excluding Jingle) which will begin to expire in 2019. The Tax Reform Act of 1986 limits the use of NOL and tax credit carryforwards in certain situations where changes occur in the stock ownership of a company. We believe that such a change has occurred, and that approximately \$1.7 million of NOL carryforwards is limited such that substantially all of these federal NOL carryforwards will never be available. Accordingly, we have not recorded a deferred tax asset for these NOL's.

In connection with the Jingle acquisition, the Company acquired federal net operating loss carryforwards ("NOL"). Where there is a "change in ownership" within the meaning of Section 382 of the Internal Revenue Code, the acquired federal net operating loss carryforwards are subject to an annual limitation. The Company believes that such an ownership change had occurred at Jingle, and that the utilization of the carryforwards is limited such that the majority of the NOL carryforwards will never be utilized. Accordingly, the Company has not recorded those amounts the Company believes it will not be able to utilize and has not included those NOL carryforwards in its deferred tax assets. The Company's estimate of NOL carryforwards that may be utilized is approximately \$7.0 million. In 2011, the Company utilized approximately \$2.6 million of NOL carryforwards.

Results of Operations

The following table presents certain financial data, derived from our unaudited consolidated statements of operations, as a percentage of total revenue for the periods indicated. The operating results for the three and nine months ended September 30, 2011 and 2012 and are not necessarily indicative of the results that may be expected for the full year or any future period.

	Nine Months Ended September 30,		Three Months Ended September 30,	
	2011	2012	2011	2012
Revenue	100%	100%	100%	100%
Expenses:				
Service costs	56%	57%	55%	59%
Sales and marketing	10%	11%	11%	8%
Product development	16%	17%	15%	16%
General and administrative	16%	17%	15%	16%
Amortization of intangible assets from acquisitions	3%	3%	4%	3%
Acquisition and separation related costs	1%	0%	0%	1%
Total operating expenses	103%	105%	100%	103%
Gain on sales and disposals of intangible assets, net	7%	5%	6%	2%
Income (loss) from operations	4%	0%	6%	(1%)
Other income (expense):				
Interest income	0%	0%	0%	0%
Interest expense	0%	(0%)	(1%)	(1%)
Other	0%	0%	0%	0%
Total other income	(0%)	(0%)	(1%)	(1%)
Income (loss) before provision for income taxes	4%	0%	5%	(2%)
Income tax expense (benefit)	2%	0%	2%	(0%)
Net income (loss)	2%	(0%)	3%	(2%)
Dividends paid to participating securities	0%	0%	0%	(0%)
Net income (loss) applicable to common stockholders	2%	(0%)	3%	(2%)

[Table of Contents](#)

Comparison of the Three months ended September 30, 2011 to the Three months ended September 30, 2012 and the Nine months ended September 30, 2011 to the Nine months ended September 30, 2012.

Revenue

The following table presents our revenues, by revenue source, for the periods presented (in thousands):

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Partner and Other Revenue Sources	\$ 91,881	\$ 95,330	\$34,820	\$32,795
Proprietary Web site Traffic Sources	15,822	8,986	5,042	2,027
Total Revenue	<u>\$107,703</u>	<u>\$104,316</u>	<u>\$39,862</u>	<u>\$34,822</u>

Our partner network revenues are primarily generated using third-party distribution networks to deliver the pay-for-call and pay-for-click advertisers' listings. The distribution network includes mobile and online search engine applications, directories, destination sites, shopping engines, third-party Internet domains or web sites, other targeted Web-based content and offline sources. We generate revenue upon delivery of qualified and reported phone calls or click-throughs to our advertisers or to advertising services providers' listings. We pay a revenue share to the distribution partners to access their mobile, online, offline or other user traffic. Other revenues include our call provisioning and call tracking services, presence management services, campaign management services, natural search optimization services and outsourced search marketing platforms. Our proprietary web site traffic revenues are generated from our portfolio of owned web sites which are monetized with pay-for-call or pay-per-click listings that are relevant to the web sites, as well as other forms of advertising, including banner advertising and sponsorships. When an online user navigates to one of our web sites and calls or clicks on a particular listing or completes the specified action, we receive a fee.

Revenue decreased 13% from \$39.9 million for the three months ended September 30, 2011 to \$34.8 million in the same period in 2012. The partner and other revenues decreased \$2.0 million primarily due to a \$2.9 million decrease in revenues from our pay-per-click services offset by a modest increase in digital call advertising.

Our arrangement with AT&T relates to a business unit that is included in a newly formed unit called YP Holdings, LLC that AT&T recently sold a majority stake in to a private equity third party. Under our primary arrangement with YP, we generate revenues from our local leads platform to sell digital call advertising and /or search marketing packages through their existing sales channels, which are then fulfilled by us across our distribution network. We are paid account fees and agency fees for our products in the form of a percentage of the cost of every call or click delivered to their advertisers. In the second quarter of 2010, we signed an extension of our arrangement with YP through September 30, 2015 that includes certain provisions for new advertiser accounts and contemplated the migration of several thousand existing advertiser accounts. It is possible the divestiture of this business unit may result in changes to our relationship and arrangement with YP, including changes that may result in a significant reduction in the paid account fees and agency fees that we receive from YP. There can be no assurance that our business with them in the future will continue at or near current levels. YP accounted for 31% and 26% of total revenues during the three months ended September 30, 2011 and 2012, respectively.

Our proprietary web site traffic revenues decreased \$3.0 million and were primarily a result of decreased revenues for cost-per-actions from resellers related to our local search and directory web sites. In the near term, we expect modestly lower to similar proprietary web site traffic revenues as a result of lower budgets for cost-per-actions from resellers particularly related to our local search and directory web sites.

Revenue decreased 3% from \$107.7 million for the nine months ended September 30, 2011 to \$104.3 million in the same period in 2012. The partner and other revenues increased \$3.4 million primarily from our digital call advertising services. This increase is partially attributable to the April 2011 Jingle acquisition. This increase was partially offset by a \$5.9 million decrease in our pay-per-click services.

Our proprietary web site traffic revenues decreased \$6.8 million and were primarily a result of decreased revenues for cost-per-actions from resellers related to our local search and directory web sites. Our ability to maintain and grow our revenues will depend in part on maintaining and increasing the number of phone calls and click-throughs performed by users of our service through our

[Table of Contents](#)

distribution partners and proprietary web site traffic sources and maintaining and increasing the number and volume of transactions and favorable variable payment terms with advertisers and advertising services providers, which we believe is dependent in part on marketing our web sites and delivering high quality traffic that ultimately results in purchases or conversions for our advertisers and advertising services providers. We may increase our direct monetization of our proprietary traffic sources which may not be at the same rate levels as other advertising providers and could adversely affect our revenues and results of operations. If we do not add new distribution partners, renew our current distribution partner agreements or replace traffic lost from terminated distribution agreements with other sources or if our distribution partners' businesses do not grow or are adversely affected, our revenue and results of operations may be materially and adversely affected. If revenue grows and the volume of transactions and traffic increases, we will need to expand our network infrastructure. Inefficiencies in our network infrastructure to scale and adapt to higher traffic volumes could materially and adversely affect our revenue and results of operations.

We anticipate that these variables will fluctuate in the future, affecting our growth rate and our financial results. In particular, it is difficult to project the number of phone calls and click-throughs we will deliver to our advertisers and how much advertisers will spend with us, and it is even more difficult to anticipate the average revenue per phone call or click-through. It is also difficult to anticipate the impact of worldwide economic conditions on advertising budgets. In addition, we believe we will experience seasonality with our business. Our quarterly results have fluctuated in the past and may fluctuate in the future due to seasonal fluctuations in levels of mobile and Internet usage and seasonal purchasing cycles of many advertisers. Our experience has shown that during the spring and summer months, mobile and Internet usage is generally lower than during other times of the year and during the latter part of the fourth quarter of the calendar year we generally experience lower call volume and reduced demand for call from our call advertising customers. The extent to which usage and call volume may decrease during these off-peak periods is difficult to predict. Prolonged or severe decreases in usage and call volume during these periods may adversely affect our growth rate and results. Additionally, the current business environment has resulted in many advertisers and reseller partners reducing advertising and marketing services budgets or changing such budgets throughout the year, which we expect will impact our quarterly results of operations in addition to the typical seasonality seen in our industry.

In late October 2012, a tropical cyclone called Hurricane Sandy severely impacted portions of the Mid-Atlantic and Northeastern United States with lesser impacts in the Southeastern and Midwestern states. We experienced reduced call volume and telecommunication systems disruption as a result of the damage caused by Hurricane Sandy. Our proprietary systems and infrastructure, as well as our telecommunications facilities, have not experienced any direct damage. However, we have seen an impact from the significant cellular and telecommunications outages in the affected areas. We believe the communications infrastructure damage that is impacting cellular and telecommunications usage will create non-recurring impacts to our fourth quarter 2012 operating results. We cannot estimate the full impact but believe it will be short-term in nature.

Expenses

Expenses were as follows (in thousands):

	Nine months ended September 30,				Three months ended September 30,			
	2011	% of revenue	2012	% of revenue	2011	% of revenue	2012	% of revenue
Service costs	\$ 60,221	56%	\$ 59,814	57%	\$21,848	55%	\$20,636	59%
Sales and marketing	11,175	10%	11,313	11%	4,547	11%	2,795	8%

[Table of Contents](#)

Stock-based compensation expense was included in the following operating expense categories as follows (in thousands):

	Nine months ended September 30,		Three months ended September 30,	
	2011	2012	2011	2012
Service costs	\$ 924	\$ 1,178	\$ 325	\$ 419
Sales and marketing	1,101	2,353	461	278
Product development	1,174	779	470	176
General and administrative	8,210	8,129	2,696	2,842
Total stock-based compensation	<u>\$ 11,409</u>	<u>\$ 12,439</u>	<u>\$ 3,952</u>	<u>\$ 3,715</u>

See Note 3—“Stock-based Compensation Plans” of the condensed consolidated financial statements as well as our Critical Accounting Policies for additional information about stock-based compensation.

Service Costs. Service costs decreased 6%, from \$21.8 million in the three months ended September 30, 2011 to \$20.6 million in the same period in 2012. The decrease was primarily attributable to a decrease in distribution partner payments, personnel costs, travel costs, facility costs, communication and network costs, depreciation and Internet domain amortization totaling \$1.4 million.

Service costs represented 55% of revenue in the three months ended September 30, 2011 as compared to 59% in 2012. The 2012 increase as a percentage of revenue in service costs was primarily a result of our proprietary web site traffic revenues comprising a lower proportion of revenue compared to 2011. Proprietary web site traffic revenues have a lower service cost as a percentage of revenue relative to our overall service cost percentage.

Service costs decreased 1%, from \$60.2 million in the nine months ended September 30, 2011 to \$59.8 million in the same period in 2012. The net decrease was primarily attributable to a decrease in distribution partner payments, personnel costs, Internet domain amortization, depreciation, fees paid to outside service providers, travel costs, and facility costs totaling \$3.0 million, offset primarily by an increase in communication and network costs and stock based compensation and to a lesser extent as a result of the April 2011 Jingle acquisition.

Service costs represented 56% of revenue in the nine months ended September 30, 2011 as compared to 57% in 2012.

We expect that user acquisition costs and revenue shares to distribution partners are likely to increase prospectively given the competitive landscape for distribution partners. To the extent that payments to pay-for-call, pay-per-click or cost-per-action distribution partners make up a larger percentage of future operations, or the addition or renewal of existing distribution partner agreements are on terms less favorable to us, we expect that service costs will increase as a percentage of revenue. To the extent of revenue declines in these areas, we expect revenue shares to distribution partners to decrease in absolute dollars. Our proprietary web site traffic sources have a lower service cost as a percentage of revenue relative to our overall service cost percentage. Our proprietary web site traffic sources have no corresponding distribution partner payments. To the extent our proprietary traffic sources make up a larger percentage of our future operations, we expect that service costs will decrease as a percentage of revenue. We expect with an increase in the proportion of partner and other revenue sources and additional investment in our network, service costs will increase as a percentage of revenue in the near term. We also expect that in the longer term service costs will increase in absolute dollars as a result of costs associated with the expansion of our operations and network infrastructure as we scale and adapt to increases in the volume of transactions, calls, and traffic and invest in our platforms.

Sales and Marketing. Sales and marketing expenses decreased 39%, from \$4.5 million for the three months ended September 30, 2011 to \$2.8 million in the same period in 2012. This decrease was primarily attributable to a decrease in personnel costs, stock based compensation, and online and outside marketing activities. As a percentage of revenue, sales and marketing expenses were 11% and 8% for the three months ended September 30, 2011 and 2012, respectively. The 2012 decrease as a percentage of revenue in sales and marketing expenses was primarily a result of lower personal costs and online and outside marketing activities as a percentage of revenue. We expect some volatility in sales and marketing expenses in the near term based on the timing of marketing initiatives but expect sales and marketing expenses in the near term to be relatively stable to modestly higher in absolute dollars.

Sales and marketing expenses increased 1% from \$11.2 million for the nine months ended September 30, 2011 to \$11.3 million in the same period in 2012. As a percentage of revenue, sales and marketing expenses were 10% and 11% for the nine months ended September 30, 2011 and 2012, respectively. The net increase in dollars and percentage of revenue was related primarily to an increase in stock based compensation related to the acceleration of certain restricted shares as part of a separation agreement, depreciation, and travel costs totaling \$1.6 million partially offset by a decrease in personnel costs, fees paid to outside service providers, and online and outside marketing activities totaling \$1.4 million. This net increase was also partially a result of the April 2011 Jingle acquisition.

[Table of Contents](#)

Product Development. Product development expenses decreased 10% from \$6.1 million for the three months ended September 30, 2011 to \$5.5 million in the same period in 2012. The decrease in dollars was primarily due to a decrease in personnel costs, stock based compensation, and fees paid to outside service providers. As a percentage of revenue, product development expenses were 15% and 16% for the three months ended September 30, 2011 and 2012, respectively. The 2012 increase as a percentage of revenue was primarily related to lower revenues with product development remaining relatively consistent. In the near term, we expect product development expenditures to continue to be relatively stable in absolute dollars. In the longer term, we expect that product development expenses will increase in absolute dollars as we increase the number of personnel and consultants to enhance our service offerings and as a result of additional stock based compensation expense.

Product development expenses increased 2%, from \$17.0 million for the nine months ended September 30, 2011 to \$17.3 million in the same period in 2012. The increase in dollars was primarily due to an increase in personnel costs, travel costs, facility costs and depreciation of \$902,000 partly related to the April 2011 Jingle acquisition. This increase was offset primarily by a decrease in stock based compensation and fees paid to outside service providers. As a percentage of revenue, product development expenses were 16% and 17% for the nine months ended September 30, 2011 and 2012, respectively.

General and Administrative. General and administrative expenses decreased 2% from \$5.9 million in the three months ended September 30, 2011 to \$5.7 million in the same period in 2012. The net decrease in dollars was primarily due to decreases in personnel costs, fees paid to outside service providers, and facility costs of \$312,000 offset partially by an increase in stock based compensation. As a percentage of revenue, general and administrative expenses were 15% and 16% for the three months ended September 30, 2011 and 2012, respectively. We expect our general and administrative expenses to be relatively stable in the near term. We expect that our general and administrative expenses will increase in the longer term to the extent that we expand our operations and incur additional costs in connection with being a public company, including expenses related to professional fees and insurance, and as a result of stock based compensation expense.

General and administrative expenses increased 2% from \$17.2 million for the nine months ended September 30, 2011 to \$17.5 million in the same period in 2012. The net increase in dollars was primarily due to an increase in fees paid to outside service providers, depreciation, and bad debt of \$780,000 offset primarily by a decrease in personnel costs, stock based compensation and other operating costs of \$442,000. As a percentage of revenue, general and administrative expenses were 16% and 17% for the nine months ended September 30, 2011 and 2012, respectively.

Amortization of Intangible Assets from Acquisitions. Intangible amortization expense decreased 37%, from \$1.7 million in the three months ended September 30, 2011 to \$1.1 million in the same period in 2012. The decrease was associated with certain intangible assets related to the April 2011 Jingle acquisition and other acquisitions prior to 2011 being fully amortized during the period. During the three months ended September 30, 2012, the amortization of intangibles related to service costs, sales and marketing, and general and administrative expenses.

Intangible amortization expense decreased 2%, from \$3.8 million in the nine months ended September 30, 2011 to \$3.7 million in the same period in 2012. The decrease was associated with certain intangible assets related to the April 2011 to the Jingle acquisition and other acquisitions prior to 2011 being fully amortized. During the nine months ended September 30, 2012, the amortization of intangibles related to service costs, sales and marketing and general and administrative expenses.

Our purchase accounting resulted in all assets and liabilities from our acquisitions being recorded at their estimated fair values on their respective acquisition dates. All goodwill, identifiable intangible assets and liabilities resulting from our acquisitions have been recorded in our financial statements. The identified intangible assets acquired in the Jingle acquisition are \$12.0 million and are being amortized over a range of useful lives of 12 to 36 months. We may acquire identifiable intangible assets as part of future acquisitions, and if so, we expect that our intangible amortization will increase in absolute dollars. Events and circumstances considered in determining whether the carrying value of amortizable intangible assets and goodwill may not be recoverable include, but are not limited to: significant changes in performance relative to expected operating results; significant changes in the use of the assets; significant negative industry or economic trends; or a significant decline in the Company's stock price and/or market capitalization for a sustained period of time. At various points in time during the nine months ended September 30, 2012, the Company's stock price approached and traded below the then book value per share. If the Company's stock price were to trade below the book value per share for an extended period of time and/or the Company experiences changes in its business, including changes in projected earnings and cash flows, the Company may have to recognize an impairment of all or some portion of goodwill.

The current business environment is subject to evolving market conditions and requires significant management judgment to interpret the potential impact to our assumptions. To the extent that changes in the current business environment impact the Company's ability to achieve levels of forecasted operating results and cash flows, or should other events occur indicating the remaining carrying value of our assets might be impaired, the Company would test its goodwill and intangible assets for impairment

[Table of Contents](#)

and may recognize an additional impairment loss to the extent that the carrying amount exceeds such asset's fair value. We will continue to monitor our financial performance, stock price and other factors in order to determine if there are any indicators of impairment prior to our annual impairment evaluation in the fourth quarter.

Acquisition and separation related costs. Acquisition and separation related costs of \$62,000 and \$1.5 million, for the three and nine months ended September 30, 2011, respectively, were primarily for professional fees to perform due diligence and other procedures associated with our acquisition of Jingle in April 2011. Acquisition and separation related costs of \$296,000 for the three months ended September 30, 2012 were primarily for professional fees and other procedures associated with our proposed separation of our business into two distinct publicly traded companies. There were no acquisition related costs for the three months ended September 30, 2012. We expect to incur additional separation related costs through the expected separation date.

During the nine months ended September 30, 2012, acquisition and separation related costs included a \$132,000 benefit recorded in the first quarter related to a revision in our original estimates regarding the future obligation related to Jingle office space due to an arrangement for the future sublease of the Jingle office space which was offset in the third quarter by separation related costs of professional fees and other procedures.

Gain on sales and disposals of intangible assets, net. Gain on sales and disposals of intangible assets, net were \$2.5 million and \$7.1 million for the three and nine months ended September 30, 2011, respectively, as compared to \$713,000 and \$5.4 million in the same periods in 2012, respectively, and were primarily attributable to the sales and disposals of Internet domain names. The decrease was due to fewer number of domain sales during the three months ended September 30, 2012 compared to the same period in 2011.

Other Income (expense). Other income (expense) were (\$196,000) and (\$268,000) in the three and nine months ended September 30 2011, respectively, compared to other income (expense) of (\$118,000) and (\$430,000) for the same periods in 2012, respectively. The net expense for the three and nine months ended September 30, 2012 was primarily due to accretion of interest expense related to the future consideration related to the April 2011 Jingle acquisition. The net expense for the three months ended September 30, 2011 was primarily due to accretion of interest expense related to the future consideration for the Jingle acquisition. The net expense for the nine months ended September 30, 2011 was primarily due to accretion of interest expense related to the future consideration for the Jingle acquisition recorded of \$341,000 net of interest income of \$141,000 which included interest related to a tax refund.

Income Taxes. Income tax expense was \$778,000 and \$1.8 million for the three and nine months ended September 30, 2011 compared to an income tax benefit of \$67,000 and income tax expense \$430,000, respectively, in the same periods in 2012.

In the three and nine months ended September 30, 2012, the effective tax rate of 11% and (100%) differed from the expected effective tax rate due to state income taxes, non-deductible stock-based compensation related to incentive stock options recorded under the fair-value method, non-cash accretion of interest expense, and other non-deductible amounts.

In the three and nine months ended September 30, 2011, the effective tax rate of 38% and 48% differed from the expected effective tax rate due to state income taxes, non-deductible stock-based compensation related to restricted stock and incentive stock options recorded under the fair-value method, acquisition related costs related to the Jingle acquisition, non-cash accretion of interest expense, and other non-deductible amounts. In addition, we recorded \$181,000 of income tax benefit associated with the completion of our federal return audits for years 2005 through 2007 in the first quarter of 2011.

Net Income (Loss). Net income (loss) decreased from \$1.3 million in the three months ended September 30, 2011 to a net loss of \$543,000 in the same period in 2012. The decrease was primarily a result a decrease in revenues and gain on sales and disposals of intangible assets, net offset by a decrease in operating expenses and income tax expense. Net income (loss) decreased from a net income of \$2.0 million in the nine months ended September 30, 2011 to a net loss of \$862,000 in the same period in 2012. This decrease was primarily a result of a decrease in revenues and gain on sales and disposals of intangible assets, net and an increase in stock based compensation. This was offset by a decrease in acquisition and separation related costs related to the Jingle acquisition in April 2011 and income tax expense.

Liquidity and Capital Resources

As of September 30, 2012, we had cash and cash equivalents of \$35.5 million and we had current and long term contractual obligations of \$35.9 million, of which \$17.9 million is for the 18th month anniversary deferred payment related to the Jingle acquisition that was paid in October 2012, and \$12.5 million for rent under our facility leases.

Cash provided by operating activities primarily consists of net income (loss) adjusted for certain non-cash items such as depreciation and amortization, deferred income taxes, stock-based compensation, acquisition related costs, and accretion of interest, gain on sales and disposals of intangible assets, net and changes in working capital. Cash provided by operating activities for the nine months ended September 30, 2012 of approximately \$15.6 million consisted primarily of net loss of \$862,000 adjusted for non-cash items of \$21.7 million, including depreciation, amortization of intangible assets, allowance for doubtful accounts and advertiser credits, stock-based compensation, deferred income taxes, excess tax benefits related to stock-based compensation, acquisition related costs, and accretion of interest expense, \$5.4 million of gain on sales and disposals of intangible assets, net and approximately \$147,000 provided by working capital and other

[Table of Contents](#)

activities. Included in the working capital amount is \$349,000 of interest accretion paid as part of the 12-month deferred acquisition payment to Jingle. Cash provided by operating activities for the nine months ended September 30, 2011 of approximately \$13.1 million consisted primarily of net income of \$2.0 million adjusted for non-cash items of \$19.5 million, including depreciation, amortization of intangible assets, allowance for doubtful accounts and advertiser credits, stock-based compensation, deferred income taxes, excess tax benefits related to stock-based compensation and accretion of interest expense, gain on sales and disposals of intangible assets, net of \$7.1 million and approximately \$1.3 million used for working capital and other activities which is net of cash received of \$163,000 related to a lease incentive.

With respect to a significant portion of our call-based and pay-per-click advertising services, the amount payable to our distribution partners will be calculated at the end of a calendar month, with a payment period following the delivery of the phone calls or click-throughs. These services constituted the majority of revenues for the three and nine months ended September 30, 2011 and 2012. We generally receive payment from advertisers in close proximity or in some cases prior to the timing of the corresponding payments to the distribution partners who provide placement for the listings. In certain cases, payments to distribution partners are paid in advance or are fixed in advance based on a guaranteed minimum amount of usage delivered. We have no corresponding payments to distribution partners related to our proprietary web site revenues.

Nearly all of the reseller partner arrangements are billed on a monthly basis following the month of our phone call or click-through delivery. This payment structure results in our advancement of monies to the distribution partners who have provided the corresponding placements of the listings. For these services, reseller partner payments are generally received two to four weeks following payment to the distribution partners. We expect that in the future periods, if the amounts from our reseller partner arrangements account for a greater percentage of our operating activity, working capital requirements will increase as a result.

We have payment arrangements with reseller partners particularly related to our proprietary web site traffic sources or our small business marketing products, such as YP, SuperMedia Inc., Yellowbook USA Inc., The Cobalt Group, and Yellow Media, Inc., whereby we receive payment between 30 and 60 days following the delivery of services. For the nine months ended and as of September 30, 2012 amounts from these partners totaled 43% of revenue and \$11.6 million in accounts receivable, respectively. Based on the timing of payments, we generally have this level of amounts in outstanding accounts receivable at any given time from these partners. There can be no assurances that these partners or other advertisers will not experience further financial difficulty, curtail operations, reduce or eliminate spend budgets, delay payments or otherwise forfeit balances owed. Net accounts receivable balances outstanding at September 30, 2012 from YP totaled \$8.2 million.

Cash provided by investing activities for the nine months ended September 30, 2012 of approximately \$3.1 million was primarily attributable to purchases for property and equipment of \$2.3 million which were more than offset by proceeds from the sales of intangible assets of approximately \$5.5 million. Cash used in investing activities for the nine months ended September 30, 2011 of approximately \$11.3 million was primarily attributable to the cash paid at closing of \$15.8 million related to the April 2011 Jingle acquisition, and purchases for property and equipment of \$2.6 million which were partially offset by proceeds from the sales of intangible assets of approximately \$7.2 million.

Cash used in financing activities for the nine months ended September 30, 2012 of approximately \$20.6 million was primarily attributable to the cash payment of the 12-month deferred acquisition payment related to the April 2011 Jingle acquisition of \$16.5 million which is net of certain working capital and other adjustments. The deferred acquisition payment excludes the interest accretion of \$349,000 which is shown as an operating cash outflow. A final deferred acquisition payment of \$17.9 million was paid in October 2012 on the 18th month anniversary of closing. Other financing activities include the repurchase of 365,000 shares of Class B common stock for treasury stock totaling approximately \$1.6 million and common stock dividend payments of \$2.8 million, partially offset by excess tax benefits related to stock-based compensation and net proceeds from the sale of stock through employee related stock plans totaling \$223,000. Cash used in financing activities for the nine months ended September 30, 2011 of approximately \$3.6 million was primarily attributable to the repurchase of 424,000 shares of Class B common stock for treasury stock totaling approximately \$3.2 million and common stock dividend payments of \$2.2 million, partially offset by net proceeds of approximately \$1.0 million from the sale of stock through employee stock options and employee stock plan purchases.

The following table summarizes our contractual obligations as of September 30, 2012 (in thousands):

	<u>Total</u>	<u>Less than 1 year</u>	<u>1-3 years</u>	<u>4-5 years</u>	<u>thereafter</u>
Contractual Obligations:					
Operating leases	\$12,461	\$ 536	\$ 4,523	\$ 4,492	\$ 2,910
Other contractual obligations (3)	23,420	\$ 19,153	3,181	1,086	—
Total contractual obligations (1),(2)	<u>\$35,881</u>	<u>\$ 19,689</u>	<u>\$ 7,704</u>	<u>\$ 5,578</u>	<u>\$ 2,910</u>

- (1) In February 2005 we entered into a license agreement with an advertising partner which provides for a contingent royalty based on a discounted rate of 3% (3.75% under certain circumstances) of certain of our gross revenues payable on a quarterly basis through December 2016. The royalty payment is recognized as incurred in service costs and is not included in the above schedule.

Table of Contents

- (2) Our tax contingencies of \$333,000 are not included due to their uncertainty.
- (3) Includes deferred acquisition payment of \$17.9 million net of other adjustments, which were paid in cash in October 2012 on the 18th month anniversary of closing related to the Jingle acquisition.

We anticipate that we will need to invest working capital towards the development and expansion of our overall operations. We may also make a significant number of acquisitions, which could result in the reduction of our cash balances or the incurrence of debt. Furthermore, we expect that capital expenditures may increase in future periods, particularly if our operating activity increases.

On November 1, 2012, we announced that our board of directors has authorized the company to pursue the separation of our business into two distinct publicly traded entities. The separation is expected to be a tax-free pro rata distribution in which the Company's existing shareholders would hold interests in: (1) Marchex, a mobile advertising company focused on calls, and (2) Archeo a domain and advertising marketplace. Completion of the proposed separation is subject to certain conditions, including final approval by the Company's board of directors, receipt of regulatory approvals, favorable tax rulings and/or opinions regarding the tax-free nature of the transaction to us and to our shareholder, further due diligence as appropriate, and the filing and effectiveness of appropriate filings with the Securities and Exchange Commission.

On April 1, 2008, we entered into a three year credit agreement which provides us with a \$30 million senior secured revolving credit line, which may be used for various corporate purposes including financing permitted acquisitions, subject to compliance with applicable covenants. During the first quarter of 2011, we signed an amendment to the credit agreement which extends the maturity period through to April 1, 2014 and increases the applicable margin rate by 25 basis points. As of September 30, 2012, we had \$30 million of availability under the credit agreement. We have not yet determined the impact of the proposed separation on our credit agreement.

In November 2006, our Board of Directors authorized a share repurchase program to repurchase up to 3 million shares of our Class B common stock as well as the initiation of a quarterly cash dividend of \$0.02 per share for the holders of the Class A common stock and Class B common stock. The Board of Directors have authorized increases in the share repurchase program to provide for the repurchase of up to 13 million shares in the aggregate (less shares previously repurchased under the share repurchase program) of our Class B common stock. Under the revised share repurchase program, repurchases may take place in the open market and in privately negotiated transactions and at times and in such amounts as we deem appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, capital availability, and other market conditions. This stock repurchase program does not have an expiration date and may be expanded, limited or terminated at any time without prior notice. During the nine months ended September 30, 2012, approximately 365,000 shares of Class B common stock were repurchased. For 2011, quarterly dividends were paid on February 15, May 16, and August 15 to Class A and Class B common stockholders of record as of the close of business of February 4, May 6, and August 5. For 2012, quarterly dividends were paid on February 15, May 15, and August 15 to Class A and Class B common stockholders of record as of the close of business of February 3, May 4, and August 3. In August 2012, our board of directors approved an increase to the quarterly cash dividend to Class A and Class B common stockholder from \$0.02 per share to \$0.035 per share. The incremental \$0.015 per share dividends were paid on August 31, 2012 to Class A and Class B stockholders of record as of the close of business of August 16, 2012. The aggregate quarterly dividends paid in February 2012, May 2012 and August 2012 were approximately \$745,000, \$743,000, and \$1.3 million, respectively. Under Delaware law, dividends to stockholders may be made only from the surplus of a company, or, in certain situations, from the net profits for the current fiscal year before the dividend is declared by the board of directors. In October 2012, our Board of Directors declared a regular quarterly dividend of \$0.035 per share on our Class A common stock and Class B common stock. Marchex will pay approximately \$1.3 million of these dividends on November 15, 2012 to the holders of record as of the close of business on November 2, 2012.

Although we expect that the annual cash dividend, subject to capital availability, will be \$0.14 per common share or approximately \$5.3 million for the foreseeable future, there can be no assurance that we will continue to pay dividends at such a rate or at all. Upon completion of the proposed separation, the quarterly dividend payments are anticipated to be transitioned from Marchex to Archeo. There can be no assurances that Archeo will continue to pay dividends at such rate or at all.

Based on our operating plans we believe that our existing credit availability, resources and cash flow provided by ongoing operations, will be sufficient to fund our operations for at least twelve months. Additional equity and debt financing may be needed to support our acquisition and separation strategies, our long-term obligations and our company's needs. If additional financing is

[Table of Contents](#)

necessary, it may not be available; and if it is available, it may not be possible for us to obtain financing on satisfactory terms. Failure to generate sufficient revenue or raise additional capital could have a material adverse effect on our ability to continue as a going concern and to achieve our intended business objectives. In addition, we anticipate if the proposed separation is consummated, it is likely to have a short term impact on our operating cash flow and additional financing may be necessary.

Critical Accounting Policies

The policies below are critical to our business operations and the understanding of our results of operations. In the ordinary course of business, we make a number of estimates and assumptions relating to the reporting of our results.

Our consolidated financial statements have been prepared using accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses and the related disclosures of contingent assets and liabilities. We base our estimates on historical experience and on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies relate to the following matters and are described below:

- Revenue;
- Goodwill and intangible assets;
- Stock-based compensation;
- Allowance for doubtful accounts, advertiser and incentive program credits; and
- Provision for income taxes.

Revenue

We currently generate revenue through our operating businesses by delivering call and click-based advertising products that enable advertisers of all sizes to reach local consumers across online, mobile and offline sources. The primary revenue driver has been performance-based advertising, which includes digital call advertising service, pay-per-click advertising, cost-per-action services and feed management and related services. For pay-for-call, pay-per-click advertising and feed management and related services, revenue is recognized upon our delivery of qualified and reported phone calls or click-throughs to our advertisers or advertising service providers' listing which occurs when an online, mobile, or offline user makes a phone call or clicks based on any of their advertisements after it has been placed by us or by our distribution partners. Each phone call or click-through on an advertisement listing represents a completed transaction. For cost-per-action services, revenue is recognized when the online user is redirected from one of our Web sites or a third party Web site in our distribution network to an advertiser Web site and completes the specified action, such as when a call is placed. In certain cases, we record revenue based on available and reported preliminary information from third parties. Collection on the related receivables may vary from reported information based upon third party refinement of the estimated and reported amounts owing that occurs subsequent to period ends.

We have entered into agreements with various distribution partners in order to expand our distribution network, which includes search engines, directories, product shopping engines, third party vertical and branded Web sites, mobile and offline sources, and our portfolio of owned Web sites, on which we include our advertisers' listings. We generally pay distribution partners based on a specified percentage of revenue or a fixed amount per phone call or click-through on these listings. We act as the primary obligor in these transactions, and we are responsible for providing customer and administrative services to the advertiser. In accordance with FASB ASC 605, the revenue derived from advertisers who receive paid introductions through us as supplied by distribution partners is reported gross based upon the amounts received from the advertiser. We also recognize revenue for certain agency contracts with advertisers under the net revenue recognition method. Under these specific agreements, we purchase listings on behalf of advertisers from search engines and directories. We are paid account fees and also agency fees based on the total amount of the purchase made on behalf of these advertisers. Under these agreements, our advertisers are primarily responsible for choosing the publisher and determining pricing, and the Company, in certain instances, is only financially liable to the publisher for the amount collected from our advertisers. This creates a sequential liability for media purchases made on behalf of advertisers. In certain instances, the web publishers engage the advertisers directly and we are paid an agency fee based on the total amount of the purchase made by the advertiser. In limited arrangements resellers pay us a fee for fulfilling an advertiser's campaign in our distribution network and we act as the primary obligor. We recognize revenue for these fees under the gross revenue recognition method.

We apply FASB ASC 605 to account for revenue arrangements with multiple deliverables. FASB ASC 605 addresses certain aspects of accounting by a vendor for arrangements under which the vendor will perform multiple revenue-generating activities. When an arrangement involves multiple deliverables, the entire fee from the arrangement is allocated to each respective deliverable based on its relative selling price and recognized when revenue recognition criteria for each deliverable are met. Selling price for each

[Table of Contents](#)

deliverable is established based on the sales price charged when the same deliverable is sold separately, the price at which a third party sells the same or similar and largely interchangeable deliverable on a standalone basis or the estimated selling price if the deliverable were to be sold separately.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of identifiable assets acquired and liabilities assumed in business combinations accounted for under the purchase method.

We apply the provisions of FASB ASC 350 “*Goodwill and Intangible Assets*” acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of FASB ASC 350. FASB ASC 350 also requires that intangible assets with definite useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with FASB ASC 360. Goodwill is tested annually for impairment and is tested for impairment more frequently if events and circumstances indicate that the asset might be impaired. Events and circumstances considered in determining whether the carrying value of goodwill may not be recoverable include, but are not limited to: significant changes in performance relative to expected operating results; significant changes in the use of the assets; significant negative industry or economic trends; and a significant decline in the Company’s stock price and/or market capitalization for a sustained period of time. At various points in time during the nine months ended September 30, 2012, the Company’s stock price approached and traded below the then book value per share. If our stock price were to trade below book value per share for an extended period of time and/or we continue to experience adverse effects of a continued downward trend in the overall economic environment, changes in the business itself, including changes in projected earnings and cash flows, we may have to recognize an impairment of all or some portion of our goodwill. An impairment loss is recognized to the extent that the carrying amount exceeds the asset’s fair value. If the fair value is lower than the carrying value, a material impairment charge may be reported in our financial results. We exercise judgment in the assessment of the related useful lives of intangible assets, the fair values and the recoverability. In certain instances, the fair value is determined in part based on cash flow forecasts and discount rate estimates. We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. To the extent such evaluation indicates that the useful lives of intangible assets are different than originally estimated, the amortization period is reduced or extended and, accordingly, amortization expense is increased or decreased. Recoverability of assets held and used is measured by a comparison of the carrying amount of an asset group to estimated undiscounted future cash flows expected to be generated by the asset group. If such asset group is considered to be impaired, the impairment is to be recognized by the amount by which the carrying amount of the assets exceeds fair value. Assets to be disposed of are separately presented on the balance sheet and reported at the lower of their carrying amount or fair value less costs to sell, and are no longer depreciated. We cannot accurately predict the amount and timing of any impairment of goodwill or other intangible assets. Should the value of goodwill or other intangible assets become impaired, we would record the appropriate charge, which could have an adverse effect on our financial condition and results of operations. The current business environment is subject to evolving market conditions and requires significant management judgment to interpret the potential impact to our assumptions. To the extent that changes in the current business environment impact our ability to achieve levels of forecasted operating results and cash flows, or should other events occur indicating the remaining carrying value of our assets might be impaired, we would test our intangible assets for impairment and may recognize an additional impairment loss to the extent that the carrying amount exceeds such asset’s fair value.

Any future impairment charges or changes to the estimated amortization periods could have a material adverse effect on our financial results.

Stock-Based Compensation

FASB ASC 718 requires the measurement and recognition of compensation for all stock-based awards made to employees, non-employees and directors including stock options, restricted stock issuances, and restricted stock units based on estimated fair values. Under the fair value recognition provisions, we recognize stock-based compensation net of an estimated forfeiture rate, and therefore only recognize compensation cost for those shares expected to vest over the requisite service period.

We generally use the Black-Scholes option pricing model as our method of valuation for stock-based awards with time-based vesting. Our determination of the fair value of stock-based awards on the date of grant using an option pricing model is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to the expected life of the award, our expected stock price, volatility over the term of the award and actual and projected exercise behaviors. For stock-based awards with time-based vesting, we are required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. We estimate the forfeiture rate based on historical experience of our stock-based awards that are granted, exercised and cancelled. If our actual forfeiture rate is materially different from our estimate, the stock-based compensation expense could be significantly different from what we have recorded in the current period. For equity awards with

[Table of Contents](#)

vesting based on a combination of certain service and market conditions, we factor an estimated probability of achieving certain service and market conditions and recognize compensation cost over the requisite service period of the award. We used a binomial lattice model to determine the fair value and a Monte Carlo simulation to determine the derived service period.

Although the fair value of stock-based awards is determined in accordance with FASB ASC 718, the assumptions used in calculating fair value of stock-based awards, the use of the Black-Scholes option pricing model, and the use of the binomial lattice model and a Monte Carlo simulation are highly subjective, and other reasonable assumptions could provide differing results. As a result, if factors change and we use different assumptions, our stock-based compensation expense could be materially different in the future. See Note 3 —“Stock-based Compensation Plans” in the condensed consolidated financial statements for additional information.

Allowance for Doubtful Accounts and Advertiser Credits

Accounts receivable balances are presented net of allowance for doubtful accounts and advertiser credits. The allowance for doubtful accounts is our best estimate of the amount of probable credit losses in our accounts receivable. We determine our allowance based on analysis of historical bad debts, advertiser concentrations, advertiser creditworthiness and current economic trends. We review the allowance for collectability on a quarterly basis. Account balances are written off against the allowance after all reasonable means of collection have been exhausted and the potential recovery is considered remote. If the financial condition of our advertisers were to deteriorate, resulting in an impairment of their ability to make payments, or if we underestimated the allowances required, additional allowances may be required which would result in increased general and administrative expenses in the period such determination was made.

We determine our allowance for advertiser credits and adjustments based upon our analysis of historical credits. Material differences may result in the amount and timing of our revenue for any period if our management made different judgments and estimates.

Provision for Income Taxes

We utilize the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax law is recognized in results of operations in the period that includes the enactment date.

Each reporting period we must assess the likelihood that our deferred tax assets will be recovered from existing deferred tax liabilities or future taxable income, and to the extent that realization is not more likely than not, a valuation allowance must be established. The establishment of a valuation allowance and increases to such an allowance may result in either an increase to income tax expense or reduction of income tax benefit in the statement of operations. Although realization is not assured, we believe it is more likely than not, based on operating performance, existing corporate structure, existing deferred tax liabilities, projections of future taxable income and tax planning strategies, that our net deferred tax assets, excluding certain state and foreign net operating loss carryforwards, will be realized. In determining that it was more likely than not that we would realize the deferred tax assets, factors considered included: historical taxable income, historical trends related to advertiser usage rates, projected revenues and expenses, macroeconomic conditions and issues facing our industry, existing contracts, our ability to project future results and any appreciation of our other assets. The majority of our deferred tax assets are from goodwill and intangible assets recorded in connection with various acquisitions that are tax-deductible over 15 year periods. Based on projections of future taxable income and tax planning strategies, we expect to be able to recover these assets. The amount of the net deferred tax assets considered realizable, however, may be reduced in the near term if our projections of future taxable income are reduced or if we do not perform at the levels we are projecting or if our proposed separation of Archeo impacts our evaluation of realizability of remaining deferred tax assets. This may result in increases to the valuation allowance for deferred tax assets and may increase income tax expense of up to the entire net amount of deferred tax assets.

From time to time, various state, federal, and other jurisdictional tax authorities undertake reviews of us and our filings. We believe any adjustments that may ultimately be required as a result of any of these reviews will not be material to the financial statements.

FASB ASC 740 clarifies the accounting for uncertainty in income taxes recognized in the financial statements. This pronouncement prescribes a recognition threshold and measurement process for recording in the financial statements uncertain tax positions taken or expected to be taken in the our tax return. FASB ASC 740 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure requirements for uncertain tax positions.

[Table of Contents](#)

As of September 30, 2012, we have net deferred tax assets of \$48.1 million, relating to the impairment of goodwill, amortization of intangibles assets, certain other temporary differences, acquired federal and state net operating loss carryforwards, and research and development credits. Although realization is not assured, we believe it is more likely than not that our net deferred tax assets, excluding certain state, city, and foreign net operating loss carryforwards, will be realized. As of September 30, 2012, based upon both positive and negative evidence available, we have determined it is not more likely than not that certain deferred tax assets primarily relating to net operating loss carryforwards in certain state, city, and foreign jurisdictions will be realizable and accordingly, have recorded a 100% valuation allowance of \$5.0 million against these deferred tax assets. We do not have a history of taxable income in the relevant jurisdictions and the state and foreign net operating loss carryforwards will more likely than not expire unutilized. Should we determine in the future that we will be able to realize these deferred tax assets, or not be able to realize all or part of our remaining net deferred tax assets recorded as of September 30, 2012, an adjustment to the net deferred tax assets would impact net income or stockholders' equity in the period such determination was made.

As of September 30, 2012, we had federal net operating loss, carryforwards (excluding Jingle) of \$1.7 million which will begin to expire in 2019. The Tax Reform Act of 1986 limits the use of NOL and tax credit carryforwards in certain situations where changes occur in the stock ownership of a company. We believe that such a change has occurred, and that approximately \$1.7 million of NOL carryforwards is limited such that substantially all of these federal NOL carryforwards will never be available. Accordingly, we have not recorded a deferred tax asset for these NOL's.

In connection with the Jingle acquisition, the Company acquired federal NOL carryforwards. Where there is a "change in ownership" within the meaning of Section 382 of the Internal Revenue Code, the acquired federal NOL carryforwards are subject to an annual limitation. The Company believes that such an ownership change had occurred at Jingle, and that the utilization of the carryforwards is limited such that the majority of the NOL carryforwards will never be utilized. Accordingly, the Company has not recorded those amounts the Company believes it will not be able to utilize and has not included those NOL carryforwards in its deferred tax assets. The Company's estimate of NOL carryforwards that may be utilized is approximately \$7.0 million. In 2011, the Company utilized approximately \$2.6 million of NOL carryforwards.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our exposure to market risk is limited to interest income sensitivity, which is affected by changes in the general level of U.S. interest rates, particularly because the majority of our investments are in short-term, money market funds. Due to the nature of our short-term investments, we believe that we are not subject to any material market risk exposure. We do not have any material foreign currency or other derivative financial instruments.

Our existing credit facility bears interest at a rate which will be, at our option, either: (i) the applicable margin rate (depending on our leverage) plus the one-month LIBOR rate reset daily, or (ii) the applicable margin rate plus the 1, 2, 3, or 6-month LIBOR rate. This facility is exposed to market rate fluctuations and may impact the interest paid on any borrowings under the credit facility. Currently, we have no borrowings under this facility; however, an increase in interest rates would impact interest expense on future borrowings.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our chief executive officer and our chief financial officer, of the effectiveness of our "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based on this evaluation, our chief executive officer and our chief financial officer have concluded that, as of the date of the evaluation, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

During the quarter ended September 30, 2012, no change was made to our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Limitations on the Effectiveness of Controls

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, cannot provide absolute assurance of achieving the desired control objectives.

[Table of Contents](#)

In addition, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Part II—Other Information

Item 1. Legal Proceedings

We are not a party to any material legal proceedings. From time to time, however, we may be subject to legal proceedings and claims in the ordinary course of business, including claims of alleged infringement of intellectual property rights, and a variety of claims arising in connection with our services.

Item 1A. Risk Factors

Set forth below and elsewhere in this report and in other documents we file with the SEC are risks and uncertainties that could cause our actual results to materially differ from the results contemplated by the forward-looking statements contained in this report and in other documents we file with the SEC. Some of the risk factors were previously disclosed in our December 31, 2011 Annual Report on Form 10-K. They have been updated to include information as of November 8, 2012.

Risks Relating to the Proposed Spin-off Transaction

The proposed spin-off of our mobile and call advertising business and domain and advertising marketplace business into two distinct publicly traded companies may not be completed on the terms or timeline currently contemplated, if at all.

In early November 2012, we announced our intention to pursue the separation of our mobile and call advertising business and domain and advertising marketplace business into two distinct publicly traded companies (the “Proposed Spin-off Transaction”). We are actively engaged in planning for the Proposed Spin-off Transaction. We expect to incur expenses in connection with the Proposed Spin-off Transaction and any delays in the anticipated completion of the Proposed Spin-off Transaction may increase these expenses. Unanticipated developments could delay or negatively impact the Proposed Spin-off Transaction, including those related to the filing and effectiveness of appropriate filings with the SEC, obtaining favorable tax rulings and or opinions regarding the tax-free nature of the transaction to us and to our stockholders, receipt of regulatory approvals, completing further due diligence as appropriate, and changes in market conditions, among other things. In addition, consummation of the Proposed Spin-off Transaction will require final approval from our Board of Directors. Therefore, we cannot assure that we will be able to complete the Proposed Spin-off Transaction on the terms or on the timeline that we announced, if at all.

The post-distribution value of our Class B common stock following completion of the Proposed Spin-off Transaction may not equal or exceed the pre-distribution value of our Class B common stock.

Following completion of the Proposed Spin-off Transaction, our Class B common stock will continue to be listed and traded on the NASDAQ Global Select Market. We cannot assure you that the trading price of our Class B common stock after the distribution, as adjusted for any changes in the capitalization of Marchex, will be equal to or greater than the trading price of our Class B common stock prior to the distribution. Until the market has fully evaluated the business of Marchex without the business subject to the spin-off, the price at which our Class B common stock trades may fluctuate significantly. Further, shares of our Class B common stock will represent an investment in two smaller separate public companies. These changes may not meet some stockholders’ investment strategies, which could cause investors to sell their shares of our Class B common stock. Excessive selling could cause the relative market price of our Class B common stock to decrease following completion of the Proposed Spin-off Transaction.

The proposed spin-off of our domain and advertising marketplace may require significant time and attention of our management, may not achieve the intended results, and may present difficulties that could have an adverse effect on us.

Execution of the Proposed Spin-off Transaction will require significant time and attention from management, which may distract management from the operation of our business and the execution of our other initiatives. Our employees may also be distracted due to uncertainty about their future roles with the separate company pending the completion of the spin-off transaction. Although the Proposed Spin-off Transaction is intended to be a tax-free pro rata distribution to our stockholders, these types of transactions are complex and there are no assurances that there will not be adverse tax liabilities in connection therewith. Further, if the spin-off transaction is completed, the transaction may not achieve the intended results. Any such difficulties could have a material adverse effect on our financial condition, results of operations or cash flows.

If the distribution is completed, our operational and financial profile will change and we will be a smaller, less diversified company.

If completed, the distribution will result in Marchex being a smaller, less diversified company focused on the mobile and call advertising business, which represents a narrower business focus than we currently have. We will have a more limited business with greater concentration in the commercial market and may be more vulnerable to changing market conditions, which could materially and adversely affect our business, financial condition and results of operations. In addition, the diversification of revenues, costs, and cash flows will diminish. As a result, it is possible that our results of operations, cash flows, working capital and financing requirements may be subject to increased volatility and it may be difficult or more expensive for us to obtain financing. Our operations may also be impacted by a limited ability to attract new employees in a timely manner.

Risks Relating to Our Company

We have largely incurred net losses since our inception, and we may incur net losses in the foreseeable future.

We had an accumulated deficit of \$138.6 million as of September 30, 2012. Our net expenses may increase based on the initiatives we undertake which for instance, may include increasing our sales and marketing activities, hiring additional personnel, incurring additional costs as a result of being a public company, acquiring additional businesses and making additional equity grants to our employees.

We are dependent on certain distribution partners, for distribution of our services, and we derive a significant portion of our total revenue through these distribution partners. A loss of distribution partners or a decrease in revenue from certain distribution partners could adversely affect our business.

A relatively small number of distribution partners currently deliver a significant percentage of calls and traffic to our advertisers, although no one distribution partner accounts for in excess of 10% of our revenues. Our existing agreements with many of our other larger distribution partners permit either company to terminate without penalty on short notice and are primarily structured on a variable-payment basis, under which we make payments based on a specified percentage of revenue or based on the number of paid phone calls or click-throughs. We intend to continue devoting resources in support of our larger distribution partners, but there are no guarantees that these relationships will remain in place over the short- or long-term. In addition, we cannot be assured that any of these distribution partners will continue to generate current levels of revenue for us or that we will be able to maintain the applicable variable payment terms at their current levels. A loss of any of these distribution partners or a decrease in revenue due to lower calls and traffic or less favorable variable payment terms from any one of these distribution relationships could have a material adverse effect on our business, financial condition and results of operations.

Companies distributing advertising through mobile or online Internet have experienced, and will likely continue to experience, consolidation. This consolidation has reduced the number of partners that control the mobile and online advertising outlets with the most user calls and traffic. According to the comScore qSearch analysis of the U.S. search marketplace for September 2012, Yahoo! and Microsoft accounted for 12.2% and 15.9%, respectively, of the core search market in the United States and Google accounted for 66.7%. As a result, the larger distribution partners have greater control over determining the market terms of distribution, including placement of call and click-based advertisements and cost of placement. In addition, many participants in the performance-based advertising and search marketing industries control significant portions of mobile and online traffic that they deliver to advertisers. We do not believe, for example, that Yahoo! and Google are as reliant as we are on a third party distribution network to deliver their services. This gives these companies a significant advantage over us in delivering their services, and with a lesser degree of risk.

We rely on certain advertiser reseller partners and agencies, including YP (through our contract with AT&T's subsidiary Yellowpages.com LLC d/b/a AT&T Interactive which is included in a newly formed business unit YP Holdings, LLC), Yellowbook USA Inc., The Cobalt Group, Super Media, Inc., Yodle and Yellow Media, Inc for the purchase of various advertising and marketing services, as well as to provide us with a large number of advertisers. A loss of certain advertiser reseller partners and agencies or a decrease in revenue from these reseller partners could adversely affect our business. Such advertisers are subject to varying terms and conditions which may result in claims or credit risks to us.

We benefit from the established relationships and national sales teams that certain of our reseller partners, who are leading reseller partners of advertisers and advertising agencies, have in place throughout the U.S. and international markets. These advertiser reseller partners and agencies refer or bring advertisers to us for the purchase of various advertising products and services. We derive a sizeable portion of our total revenue through these advertiser reseller partners and agencies. A loss of certain advertiser reseller partners and agencies or a decrease in revenue from these clients could adversely affect our business. YP is our largest advertiser reseller partner and was responsible for 27% of our total revenues for the nine months ended September 30, 2012. In April of 2012, AT&T sold of a majority stake in its yellow pages business unit YP Holdings, LLC (including AT&T Interactive) to a third party. We are uncertain whether such a divestiture will occur in an orderly fashion and whether it will impact our business relationship with YP. We cannot predict whether our business with YP in the future will continue at or near current levels and any decrease in such levels could have a material adverse impact on our business and results of operations.

These advertisers may in certain cases be subject to negotiated terms and conditions separate from those applied to online clients accepted and processed through our automated advertiser management platform. In some cases, the applicable contract terms may be the result of legacy or industry association documentation or simply customized advertising solutions for large reseller partners and agencies. In any case, as a consequence of such varying terms and conditions, we may be subject to claims or credit risks that we may otherwise mitigate more efficiently across our automated advertiser management platform.

These claims and risks may vary depending on the nature of the aggregated client base. Among other claims, we may be subject to disputes based on third party tracking information or analysis. We may also be subject to differing credit profiles and risks based on

[Table of Contents](#)

the agency relationship associated with these advertisers. For such advertisers, payment may be made on an invoice basis, unlike our retail platform which in many instances is paid in advance of the service. In some limited circumstances we may also have accepted individual advertiser payment liability in place of liability of the advertising agency or media advisor.

We received approximately 50% of our revenue from our five largest customers for both the year ended December 31, 2011 and the nine months ended September 30, 2012, and the loss of one or more of these customers could adversely impact our results of operations and financial condition.

Our five largest customers accounted for approximately 50% of our total revenues for both the year ended December 31, 2011 and the nine months ended September 30, 2012. YP is our largest customer and was responsible for 27% of our total revenues for the nine months ended September 30, 2012 and 32% of accounts receivable at September 30, 2012. Certain of these customers are not subject to long term contracts with us and are generally able to reduce advertising spending at any time and for any reason. A significant reduction in advertising spending by our largest customers, or the loss of one or more of these customers, if not replaced by new customers or an increase in business from existing customers, would adversely affect revenues. This could have a material adverse effect on our results of operations and financial condition.

Our large customers have substantial negotiating leverage, which may require that we agree to terms and conditions that may have an adverse effect on our business.

Our large customers have substantial purchasing power and leverage in negotiating contractual arrangements with us. These customers may seek for us to develop additional features, may require penalties for failure to deliver such features, may seek discounted product or service pricing and may seek more favorable contractual terms. As we sell more products and services to this class of customer, we may be required to agree to such terms and conditions. Such large customers also have substantial leverage in negotiating resolution of any disagreements or disputes than may arise. Any of the foregoing factors could result in a material adverse effect on our business, financial condition and results of operations.

If some of our customers experience financial distress or suffer disruptions in their business, their weakened financial position could negatively affect our own financial position and results.

We have a diverse customer base and, at any given time, one or more customers may experience financial distress, file for bankruptcy protection, go out of business, or suffer disruptions in their business. If a customer with whom we do a substantial amount of business experiences financial difficulty or suffers disruptions in their business, it could delay or jeopardize the collection of accounts receivable, result in significant reductions in services provided by us and may have a material adverse effect on our results of operations and liquidity.

We may incur liabilities for the activities of our advertisers, reseller partners, distribution partners and other users of our services, which could adversely affect our business.

Many of our advertisement generation and distribution processes are automated. In some cases, advertisers or reseller partners use our online tools and account management systems to create and submit advertiser listings and in other cases we create and submit advertising listing on behalf of our advertisers or reseller partners. These advertiser listings are submitted in a bulk data feed or through the distribution partners' user interface. Although we monitor our distribution partners on an ongoing basis primarily for traffic quality, these partners control the distribution of the advertiser listings provided in the data feed or user interface submissions.

We have a large number of distribution partners who display our advertiser listings on their networks. Our advertiser listings are delivered to our distribution partners in an automated fashion through an XML data feed or data dump or through the distribution partners' user interface. Our distribution partners are contractually required to use the listings created by our advertiser customers in accordance with applicable laws and regulations and in conformity with the publication restrictions in our agreements, which are intended to promote the quality and validity of the traffic provided to our advertisers. Nonetheless, we do not operationally control or manage these distribution partners and any breach of these agreements on the part of any distribution partner or its affiliates could result in liability for our business. These agreements include indemnification obligations on the part of our distribution partners, but there is no guarantee that we would be able to collect against offending distribution partners or their affiliates in the event of a claim under these indemnification provisions. Alternatively, we may incur substantial costs as part of our indemnification obligations to distribution partners for liability they may incur as a result of displaying content we have provided them.

We do not conduct a manual editorial review of a substantial number of the advertiser listings directly submitted by advertisers or reseller partners online, nor do we manually review the display of the vast majority of the advertiser listings by our distribution partners submitted to us by XML data feeds or data dumps or the distribution partners' user interface. Likewise, in cases where we provide editorial or value-added services for our large reseller partners or agencies, such as ad creation and optimization for local advertisers or landing pages and micro-sites for pay-for-call customers, we rely on the content and information provided to us by these agents on behalf of their individual advertisers. We do not investigate the individual business activities of these advertisers other than

[Table of Contents](#)

the information provided to us or in some cases review of advertiser web sites. We may not successfully avoid liability for unlawful activities carried out by our advertisers or reseller partners and other users of our services or unpermitted uses of our advertiser listings by distribution partners and their affiliates.

Our potential liability for unlawful activities of our advertisers and other users of our services or unpermitted uses of our advertiser listings and advertising services and platform by distribution partners and reseller partners and agencies could require us to implement measures to reduce our exposure to such liability, which may require us, among other things, to spend substantial resources, to discontinue certain service offerings or to terminate certain distribution partner relationships. For example, as a result of the actions of advertisers in our network, we may be subject to private or governmental actions relating to a wide variety of issues, such as privacy, gambling, promotions, and intellectual property ownership and infringement. Under agreements with certain of our larger distribution partners, we may be required to indemnify these distribution partners against liabilities or losses resulting from the content of our advertiser listings, or resulting from third party intellectual property infringement claims. Although our advertisers agree to indemnify us with respect to claims arising from these listings, we may not be able to recover all or any of the liabilities or losses incurred by us as a result of the activities of our advertisers.

Our insurance policies may not provide coverage for liability arising out of activities of users of our services. In addition, our reliance on some content and information provided to us by our large advertiser reseller partners and agencies may expose us to liability not covered by our insurance policies. Furthermore, we may not be able to obtain or maintain adequate insurance coverage to reduce or limit the liabilities associated with our businesses. Any costs incurred as a result of such liability or asserted liability could have a material adverse effect on our business, operating results and financial condition.

If we do not maintain and grow a critical mass of advertisers and distribution partners, the value of our services could be adversely affected.

Our success depends, in large part, on the maintenance and growth of a critical mass of advertisers and distribution partners and a continued interest in our pay-for-call, performance-based advertising, telemarketing analytics and search marketing services. Advertisers will generally seek the most competitive return on investment from advertising and marketing services. Distribution partners will also seek the most favorable payment terms available in the market. Advertisers and distribution partners may change providers or the volume of business with a provider, unless the product and terms are competitive. In this environment, we must compete to acquire and maintain our network of advertisers and distribution partners. If our business is unable to maintain and grow our base of advertisers, our current distribution partners may be discouraged from continuing to work with us, and this may create obstacles for us to enter into agreements with new distribution partners. Our business also in part depends on certain of our large reseller partners and agencies to grow their base of advertisers as these advertisers become increasingly important to our business and our ability to attract additional distribution partners and opportunities. Similarly, if our distribution network does not grow and does not continue to improve over time, current and prospective advertisers and reseller partners and agencies may reduce or terminate this portion of their business with us. Any decline in the number of advertisers and distribution partners could adversely affect the value of our services.

The mobile advertising market may develop more slowly than expected, which could harm our business.

If the market for mobile marketing and advertising develops more slowly than we expect, our business could suffer. Our future success is highly dependent on the commitment of advertisers and marketers to mobile communications as an advertising and marketing medium, the willingness of our potential advertisers to outsource their mobile advertising and marketing needs, and our ability to sell our mobile advertising services to reseller partners and agencies. The mobile advertising and marketing market is relatively new and rapidly evolving. Businesses, including current and potential advertisers, may find mobile advertising or marketing to be less effective than traditional advertising media or marketing methods or other technologies for promoting their products and services. As a result, the future demand and market acceptance for mobile marketing and advertising is uncertain. Many of our current or potential advertisers have little or no experience using mobile communications for advertising or marketing purposes and have allocated only a limited portion of their advertising or marketing budgets to mobile communications advertising or marketing, and there is no certainty that they will allocate more funds in the future, if any.

We are dependent upon the quality of mobile, online, offline and other traffic sources in our network to provide value to our advertisers and the advertisers of our reseller partners, and any failure in our quality control could have a material adverse effect on the value of our services to our advertisers and adversely affect our revenues.

We utilize certain monitoring processes with respect to the quality of the mobile, online, offline and other traffic sources that we deliver to our advertisers. Among the factors we seek to monitor are sources and causes of low quality phone calls such as unwanted telemarketer calls and clicks such as non-human processes, including robots, spiders or other software, the mechanical automation of clicking, and other types of invalid clicks, click fraud, or click spam, the purpose of which is something other than to view the underlying content. Additionally, we also seek to identify other indicators which may suggest that a user may not be targeted by or

[Table of Contents](#)

desirable to our advertisers. Even with such monitoring in place, there is a risk that a certain amount of low quality mobile, online, offline and other traffic or traffic that is deemed to be less valuable by our advertisers will be delivered to such advertisers, which may be detrimental to those relationships. We have regularly refunded fees that our advertisers had paid to us which were attributed to low quality mobile, online, offline and other traffic. If we are unable to stop or reduce low quality Internet traffic and low quality phone calls, these refunds may increase. Low quality mobile, online, offline and other traffic may further prevent us from growing our base of advertisers and cause us to lose relationships with existing advertisers, or become the target of litigation, both of which would adversely affect our revenues.

We depend on being able to secure enough phone numbers to support our advertisers and other users of our services and any obstacles that we face which prevent us from meeting this demand could adversely affect our business.

We utilize phone numbers as part of a number of information and analytic services to advertisers, such as our pay-for-call, call tracking and call analytics services. Our services that utilize phone numbers are designed to enable advertisers and other users of our services to utilize mobile, online and offline advertising and to help measure the effectiveness of mobile, online and offline advertising campaigns. We secure a majority of our phone numbers through telecommunication carriers that we have contracted with and a smaller number through the 800 Service Management System, and such telecommunication carriers provide the underlying telephone service. Our telecommunications carriers and telephone number acquisition process are subject to the rules and guidelines established by the Federal Communications Commission. Furthermore, to the extent we offer call recording and pay-for-call services, we may be directly subject to certain telecommunications-related regulations. The Federal Communications Commission and our telecommunication carriers may change the rules and guidelines for securing phone numbers or change the requirements for retaining the phone numbers we have already secured. As a result, we may not be able to secure or retain sufficient phone numbers needed for our services. We may also be limited in the number of available telecommunications carriers or vendors to provide such phone numbers to us in the event of any industry consolidations.

Our acquisition of certain automated voice and mobile advertising-based technologies is heavily reliant on vendors.

Certain voice and mobile advertising-based products that we acquired as part of our acquisition of Jingle are heavily reliant on vendors. The free directory product that we provide relies on technology provided by third party vendors that include voice recognition software and business, government and residence data listings. We cannot guarantee that the technology, data and services provided by our third party vendors will be of sufficient quality to meet the demands of our customers and partners. Further, we cannot guarantee that the technologies, data and services will be available to us in the future on acceptable terms, if at all. Any perception by our customers or partners that our voice and mobile advertising-based products are incomplete or not of sufficient quality could lead to a loss in confidence by our customers or partners, which in turn could lead to a decline in revenues. If we are unable to continue maintaining, advancing and improving our voice and mobile advertising-based products, our operating results may be adversely affected.

We may be subject to intellectual property claims, which could adversely affect our financial condition and ability to use certain critical technologies, divert our resources and management attention from our business operations and create uncertainty about ownership of technology essential to our business.

Our success depends, in part, on our ability to operate without infringing on the intellectual property rights of others. There can be no guarantee that any of our intellectual property will not be challenged by third parties. We may be subject to patent infringement claims or other intellectual property infringement claims, including claims of trademark infringement in connection with our acquisition of previously-owned Internet domain names and claims of copyright infringement with respect to certain of our proprietary web sites that would be costly to defend and could limit our ability to use certain critical technologies.

The expansion of our digital call advertising business increases the potential intellectual property infringement claims we may be subject to, particularly in light of the large number of patents which have been issued (or are pending) in the telecommunications field over the last several decades, both in the U.S. and internationally. Jingle, which we acquired in 2011, was subject to patent infringement claims which were unsuccessful at trial. We recently resolved this matter and obtained a license to the patents at issue.

Any patent or other intellectual property litigation could negatively impact our business by diverting resources and management attention from other aspects of the business and adding uncertainty as to the ownership of technology, services and property that we view as proprietary and essential to our business. In addition, a successful claim of patent infringement against us and our failure or inability to license the infringed or similar technology on reasonable terms, or at all, could prevent us from using critical technologies which could have a material adverse effect on our business.

We may need additional funding to meet our obligations and to pursue our business strategy. Additional funding may not be available to us and our financial condition could therefore be adversely affected.

We may require additional funding to meet our ongoing obligations and to pursue our business strategy, which may include the selective acquisition of businesses and technologies. In addition, we have incurred and we may incur certain obligations in the future. There can be no assurance that if we were to need additional funds to meet these obligations that additional financing arrangements would be available in amounts or on terms acceptable to us, if at all. Furthermore, if adequate additional funds are not available, we will be required to delay, reduce the scope of, or eliminate material parts of the implementation of our business strategy, including potential additional acquisitions or internally-developed businesses.

Our acquisitions could divert management's attention, cause ownership dilution to our stockholders, cause our earnings to decrease and be difficult to integrate.

Our business strategy includes identifying, structuring, completing and integrating acquisitions. Acquisitions in the technology and Internet sectors involve a high degree of risk. We may also be unable to find a sufficient number of attractive opportunities to meet our objectives which include revenue growth, profitability and competitive market share. Our acquired companies may have histories of net losses and may expect net losses for the foreseeable future. Acquisitions are accompanied by a number of risks that could harm our business, operating results and financial condition:

- We could experience a substantial strain on our resources, including time and money, and we may not be successful;
- Our management's attention could be diverted from our ongoing business concerns;
- While integrating new companies, we may lose key executives or other employees of these companies;
- We may issue shares of our Class B common stock as consideration for acquisitions which may result in ownership dilution to our stockholders;
- We could fail to successfully integrate our financial and management controls, technology, reporting systems and procedures, or adequately expand, train and manage our workforce;
- We could experience customer dissatisfaction or performance problems with an acquired company or technology;
- We could become subject to unknown or underestimated liabilities of an acquired entity or incur unexpected expenses or losses from such acquisitions;
- We could incur possible impairment charges related to goodwill or other intangible assets or other unanticipated events or circumstances, any of which could harm our business; and
- We may be exposed to investigations and/or audits by federal, state or other taxing authorities.

Consequently, we might not be successful in integrating any acquired businesses, products or technologies, and might not achieve anticipated revenue and cost benefits.

Our expanding international operations subject us to additional risks and uncertainties and we may not be successful with our strategy to continue to expand such operations.

One potential area of growth for us is in international markets. We have initiated operations, through our subsidiaries, in Ireland and the United Kingdom. Our international expansion and the integration of international operations present unique challenges and risks. Compliance with complex foreign and U.S. laws and regulations that apply to our international operations increases our cost of doing business in international jurisdictions and could interfere with our ability to offer our products and services to one or more countries or expose us or our employees to fines and penalties. Our continued international expansion also subjects us to increased foreign currency exchange rate risks and will require additional management attention and resources. We cannot assure you that we will be successful in our international expansion. There are risks inherent in conducting business in international markets, including the need to localize our products and services to foreign customers' preferences and customs, difficulties in managing operations due to language barriers, distance, staffing and cultural differences, application of foreign laws and regulations to us, tariffs and other trade barriers, fluctuations in currency exchange rates, establishing management systems and infrastructures, reduced protection for intellectual property rights in some countries, changes in foreign political and economic conditions, and potentially adverse tax consequences. Our failure to address these risks adequately could materially and adversely affect our business, revenue, results of operations and financial condition.

The loss of our senior management, including our founders, could harm our current and future operations and prospects.

We are heavily dependent upon the continued services of Russell C. Horowitz, our chairman and chief executive officer, and the other members of our senior management team. Each member of our senior management team is an at-will employee and may voluntarily terminate his employment with us at any time with minimal notice. Following any termination of employment, each of these employees would only be subject to a twelve-month non-competition and non-solicitation obligation with respect to our customers and employees under our standard confidentiality agreement.

[Table of Contents](#)

Further, as of September 30, 2012, Russell C. Horowitz, Ethan A. Caldwell, Peter Christothoulou and John Keister, our founders, together controlled 90% of the combined voting power of our outstanding capital stock. Their collective voting control is not tied to their continued employment with Marchex. The loss of the services of any member of our senior management, including our founders, for any reason, or any conflict among our founders, could harm our current and future operations and prospects.

We may have difficulty retaining current personnel as well as attracting and retaining additional qualified, experienced, highly skilled personnel, which could adversely affect the implementation of our business plan.

Our performance is largely dependent upon the talents and efforts of highly skilled individuals. In order to fully implement our business plan, we will need to retain our current qualified personnel, as well as attract and retain additional qualified personnel. Thus, our success will in significant part depend upon our retention of current personnel as well as the efforts of personnel not yet identified and upon our ability to attract and retain highly skilled managerial, engineering, sales and marketing personnel. We are also dependent on managerial and technical personnel to the extent they may have knowledge or information about our businesses and technical systems that may not be known by our other personnel. There can be no assurance that we will be able to attract and retain necessary personnel. The failure to hire and retain such personnel could adversely affect the implementation of our business plan.

If we are unable to obtain and maintain adequate insurance, our financial condition could be adversely affected in the event of uninsured or inadequately insured loss or damage. Our ability to effectively recruit and retain qualified officers and directors may also be adversely affected if we experience difficulty in maintaining adequate directors' and officers' liability insurance.

We may not be able to obtain and maintain insurance policies on terms affordable to us that would adequately insure our business and property against damage, loss or claims by third parties. To the extent our business or property suffers any damages, losses or claims by third parties that are not covered or adequately covered by insurance, our financial condition may be materially adversely affected.

We currently have directors' and officers' liability insurance. If we are unable to maintain sufficient insurance as a public company to cover liability claims made against our officers and directors, we may not be able to retain or recruit qualified officers and directors to manage our company, which could have a material adverse effect on our operations.

It may be difficult for us to retain or attract qualified officers and directors, which could adversely affect our business and our ability to maintain the listing of our Class B common stock on the NASDAQ Global Select Market.

We may be unable to attract and retain qualified officers, directors and members of board committees required to provide for our effective management as a result of changes in the rules and regulations which govern publicly-held companies, including, but not limited to, certifications from executive officers and requirements for financial experts on boards of directors. The perceived increased personal risk associated with these changes may deter qualified individuals from accepting these roles. Further, applicable rules and regulations of the Securities and Exchange Commission and the NASDAQ Stock Market heighten the requirements for board or committee membership, particularly with respect to an individual's independence from the corporation and level of experience in finance and accounting matters. We may have difficulty attracting and retaining directors with the requisite qualifications. If we are unable to attract and retain qualified officers and directors, our business and our ability to maintain the listing of our shares of Class B common stock on the NASDAQ Global Select Market could be adversely affected.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud, which could harm our brand and operating results.

Effective internal controls are necessary for us to provide reliable and accurate financial reports and effectively prevent fraud. We have devoted significant resources and time to comply with the internal control over financial reporting requirements of the Sarbanes-Oxley Act of 2002. In addition, Section 404 under the Sarbanes-Oxley Act of 2002 requires that we assess and our auditors attest to the effectiveness of our controls over financial reporting. Our current and future compliance with the annual internal control report requirement will depend on the effectiveness of our financial reporting and data systems and controls across our operating subsidiaries. We expect these systems and controls to become increasingly complex to the extent that we integrate acquisitions and our business grows. To effectively manage this growth, we will need to continue to improve our operational, financial and management controls and our reporting systems and procedures. We cannot be certain that these measures will ensure that we design, implement and maintain adequate controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation or operation, could harm our operating results or cause us to fail to meet our financial reporting obligations. Inadequate internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock and our access to capital.

Impairment of goodwill and other intangible assets would result in a decrease in earnings.

Current accounting rules require that goodwill and other intangible assets with indefinite useful lives no longer be amortized, but instead be tested for impairment at least annually. These rules also require that intangible assets with definite useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Events and circumstances considered in determining whether the carrying value of amortizable intangible assets and goodwill may not be recoverable include, but are not limited to, significant changes in performance relative to expected operating results, significant changes in the use of the assets, significant negative industry or economic trends, or a significant decline in our stock price and/or market capitalization for a sustained period of time. To the extent such evaluation indicates that the useful lives of intangible assets are different than originally estimated, the amortization period is reduced or extended and, accordingly, the quarterly amortization expense is increased or decreased. To the extent such evaluation indicates that the useful lives of intangible assets are different than originally estimated, the amortization period is reduced or extended and, accordingly, amortization expense is increased or decreased.

We recorded a substantial non-cash impairment charge for goodwill and intangible assets during the fourth quarter of 2008 as a result of the impact of the adverse economic environment including the deterioration in the equity and credit markets. We may be required to record a future charge to earnings in our financial statements during the period in which any additional impairment of our goodwill or amortizable intangible assets is determined. Any impairment charges or changes to the estimated amortization periods could have a material adverse effect on our financial results.

At various points in time during the nine months ended September 30, 2012, the Company's stock price approached and traded below the then book value per share. If the Company's stock price were to trade below the book value per share for an extended period of time and/or the Company experiences changes in its business, including changes in projected earnings and cash flows, the Company may have to recognize an impairment of all or some portion of goodwill.

We may be required to establish a valuation allowance against our deferred income tax asset.

Factors in our ability to realize a tax benefit from our deferred income tax asset include tax attributes and operating results of acquired businesses, the nature, extent and periods that temporary differences are expected to reverse and our expectations about future operating results. If we determine that all or a portion of the deferred income tax asset will not result in a future tax benefit, a valuation allowance may be established with a corresponding charge to net income. Such charges may have a material adverse effect on our results of operations or financial condition. The likelihood of recording such a valuation allowance may be impacted by our acquisitions, or by our proposed separation of Archeo into a separate public company, and increases during periods of economic downturn.

We may not be able to realize the intended and anticipated benefits from our acquisitions of Internet domain names in part due to our increasing business focus on digital call advertising products, which could affect the value of these acquisitions to our business and our ability to meet our financial obligations and targets.

We may not be able to realize the intended and anticipated benefits from our acquisitions of Internet domain names in part due to our increasing focus on digital call advertising products. These intended and anticipated benefits included increasing our cash flow from operations, broadening our distribution offerings and delivering services that strengthen our advertiser relationships.

If the acquired assets are not integrated into our business as we had anticipated, we may not be able to achieve these benefits or realize the value paid for our acquisitions of Internet domain names, which could materially harm our business, financial condition and results of operations.

We do not control the means by which users access our web sites, and material changes to current navigation practices or technologies or marketing practices or significant increases in our marketing costs could result in a material adverse effect on our business.

The success of our proprietary web site traffic sources depends in large part upon consumer access to our web sites. Consumers access our web sites primarily through the following methods: directly accessing our web sites by typing descriptive keywords or keyword strings into the uniform resource locator (URL) address box of an Internet browser; accessing our web sites by clicking on bookmarked web sites; and accessing our web sites through search engines and directories.

Each of these methods requires the use of a third party product or service, such as an Internet browser or search engine application or directory. Internet browsers may provide alternatives to the URL address box to locate web sites, and search engines may from time to time change and establish rules regarding the indexing and optimization of web sites. We also market certain web sites through search engine applications. Historically, we have limited our search engine marketing to less than five leading search engines.

[Table of Contents](#)

Product developments and market practices for these means of access to our web sites are not within our control. We may experience a decline in traffic to our web sites if third party browser technologies or search engine methodologies and rules are changed to our disadvantage. We have experienced abrupt search engine algorithm and policy changes in the past. We expect the search engine applications we utilize to market and drive users to our web sites to continue to periodically change their algorithms, policies and technologies. These changes may result in an interruption in users ability to access our web sites or impair our ability to maintain and grow the number of users who visit our web sites. We may also be forced to significantly increase marketing expenditures in the event that market prices for online advertising and paid-listings escalate. Any of these changes could have a material adverse effect on our business.

We may experience unforeseen liabilities in connection with our acquisitions of Internet domain names or arising out of third party domain names included in our distribution network, which could negatively impact our financial results.

Certain of our acquisitions involved the acquisition of a large number of previously-owned Internet domain names. Furthermore, we have separately acquired and may acquire in the future additional previously-owned Internet domain names. In some cases, these acquired names may have trademark significance that is not readily apparent to us or is not identified by us in the bulk purchasing process. As a result we may face demands by third party trademark owners asserting infringement or dilution of their rights and seeking transfer of acquired Internet domain names under the Uniform Domain Name Dispute Resolution Policy administered by ICANN or actions under the U.S. Anti-Cybersquatting Consumer Protection Act. Additionally, we display pay-for-call or pay-per-click listings on third party domain names and third party web sites that are part of our distribution network, which also could subject us to a wide variety of civil claims including intellectual property ownership and infringement.

We intend to review each claim or demand which may arise from time to time on its merits on a case-by-case basis with the assistance of counsel and we intend to transfer any rights acquired by us to any party that has demonstrated a valid prior right or claim. We cannot, however, guarantee that we will be able to resolve these disputes without litigation. The potential violation of third party intellectual property rights and potential causes of action under consumer protection laws may subject us to unforeseen liabilities including injunctions and judgments for money damages.

Risks Relating to Our Business and Our Industry

If we are unable to compete in the highly competitive performance-based advertising and search marketing industries, we may experience reduced demand for our products and services.

We operate in a highly competitive and changing environment. We principally compete with other companies which offer services in the following areas:

- sales to advertisers of pay-for-call services;
- sales to advertisers of pay-per-click services;
- aggregation or optimization of online advertising for distribution through mobile and online search engines and applications, product shopping engines, directories, web sites or other offline outlets;
- provision of local and vertical web sites containing information and user feedback designed to attract users and help consumers make better, more informed local decisions, while providing targeted advertising inventory for advertisers;
- delivery of pay-for-call advertising to end users or customers of advertisers through mobile and online destination web sites or other offline distribution outlets;
- delivery of online advertising to end users or customers of advertisers through mobile and online destination web sites or other offline distribution outlets;
- local search sales training;
- services and outsourcing of technologies that allow advertisers to manage their advertising campaigns across multiple networks and track the success of these campaigns;
- third party domain monetization; and
- sales to advertisers of call tracking, call analytics, and presence management services.

Although we currently pursue a strategy that allows us to potentially partner with all relevant companies in the industry, there are certain companies in the industry that may not wish to partner with us. Despite the fact that we currently work with several of our potential competitors, there are no guarantees that these companies will continue to work with us in the future.

[Table of Contents](#)

We currently or potentially compete with a variety of companies, including Google, IAC/InterActiveCorp, Microsoft, Yahoo!, Yext! and ReachLocal. Many of these actual or perceived competitors also currently or may in the future have business relationships with us, particularly in distribution. However, such companies may terminate their relationships with us. Furthermore, our competitors may be able to secure agreements with us on more favorable terms, which could reduce the usage of our services, increase the amount payable to our distribution partners, reduce total revenue and thereby have a material adverse effect on our business, operating results and financial condition. We expect competition to intensify in the future because current and new competitors can enter our market with little difficulty. The barriers to entering our market are relatively low. In fact, many current Internet and media companies presently have the technical capabilities and advertiser bases to enter the search marketing services industry. Further, if the consolidation trend continues among the larger media and search engine companies with greater brand recognition, the share of the market remaining for smaller search marketing services providers could decrease, even though the number of smaller providers could continue to increase. These factors could adversely affect our competitive position.

Some of our competitors, as well as potential entrants into our market, may be better positioned to succeed in this market. They may have:

- longer operating histories;
- more management experience;
- an employee base with more extensive experience;
- better geographic coverage;
- larger customer bases;
- greater brand recognition; and
- significantly greater financial, marketing and other resources.

Currently, and in the future, as the use of the Internet and other mobile and online services increases, there will likely be larger, more well-established and well-financed entities that acquire companies and/or invest in or form joint ventures in categories or countries of interest to us, all of which could adversely impact our business. Any of these trends could increase competition and reduce the demand for any of our services.

We face competition from traditional media companies, and we may not be included in the advertising budgets of large advertisers, which could harm our operating results.

In addition to Internet companies, we face competition from companies that offer traditional media advertising opportunities. Most large advertisers have set advertising budgets, a very small portion of which is allocated to Internet advertising. We expect that large advertisers will continue to focus most of their advertising efforts on traditional media. If we fail to convince these companies to spend a portion of their advertising budgets with us, or if our existing advertisers reduce the amount they spend on our programs, our operating results would be harmed.

If we are not able to respond to the rapid technological change characteristic of our industry, our products and services may cease to be competitive.

The market for our products and services is characterized by rapid change in business models and technological infrastructure, and we will need to constantly adapt to changing markets and technologies to provide new and competitive products and services. If we are unable to ensure that our users, advertisers, reseller partners, and distribution partners have a high-quality experience with our products and services, then they may become dissatisfied and move to competitors' products and services. Accordingly, our future success will depend, in part, upon our ability to develop and offer competitive products and services for both our target market and for applications in new markets. We may not, however, be able to successfully do so, and our competitors may develop innovations that render our products and services obsolete or uncompetitive.

Our technical systems are vulnerable to interruption and damage that may be costly and time-consuming to resolve and may harm our business and reputation.

A disaster could interrupt our services for an indeterminate length of time and severely damage our business, prospects, financial condition and results of operations. Our systems and operations are vulnerable to damage or interruption from:

- fire;
- floods;
- network failure;

[Table of Contents](#)

- hardware failure;
- software failure;
- power loss;
- telecommunications failures;
- break-ins;
- terrorism, war or sabotage;
- computer viruses;
- denial of service attacks;
- penetration of our network by unauthorized computer users and “hackers” and other similar events;
- natural disasters, including, but not limited to, hurricanes, tornadoes, and earthquakes; and
- other unanticipated problems.

We may not have developed or implemented adequate protections or safeguards to overcome any of these events. We also may not have anticipated or addressed many of the potential events that could threaten or undermine our technology network. Any of these occurrences could cause material interruptions or delays in our business, result in the loss of data or render us unable to provide services to our customers. In addition, if a person is able to circumvent our security measures, he or she could destroy or misappropriate valuable information, including sensitive customer information, or disrupt our operations. We have deployed firewall hardware intended to thwart hacker attacks. Although we maintain property insurance and business interruption insurance, our insurance may not be adequate to compensate us for all losses that may occur as a result of a catastrophic system failure or other loss, and our insurers may not be able or may decline to do so for a variety of reasons. If we fail to address these issues in a timely manner, we may lose the confidence of our advertisers, reseller partners, and distribution partners, our revenue may decline and our business could suffer. In addition, as we expand our service offerings and enter into new business areas, we may be required to significantly modify and expand our software and technology platform. If we fail to accomplish these tasks in a timely manner, our business and reputation will likely suffer. Furthermore, some of these events could disrupt the economy and/or our customers’ business activities and in turn materially affect our operating results.

We rely on third party technology, platforms, carriers, communications providers, and server and hardware providers, and a failure of service by these providers could adversely affect our business and reputation.

We rely upon third party colocation providers to host our main servers. If these providers are unable to handle current or higher volumes of use, experience any interruption in operations or cease operations for any reason or if we are unable to agree on satisfactory terms for continued hosting relationships, we would be forced to enter into a relationship with other service providers or assume hosting responsibilities ourselves. If we are forced to switch hosting facilities, we may not be successful in finding an alternative service provider on acceptable terms or in hosting the computer servers ourselves. We may also be limited in our remedies against these providers in the event of a failure of service. In the past, we have experienced short-term outages in the service maintained by one of our colocation providers.

We also rely on a select group of third party providers for components of our technology platform and support for our advertising and call-based services, such as hardware and software providers, telecommunications carriers and Voice over Internet Protocol (VoIP) providers, credit card processors and domain name registrars. As a result, key operational resources of our business are concentrated with a limited number of third party providers. A failure or limitation of service or available capacity by any of these third party providers could adversely affect our business and reputation. Furthermore, if any of these significant providers are unable to provide the levels of service and dedicated resources over time that we required in our business, we may not be able to replace certain of these providers in a manner that is efficient, cost-effective or satisfactory to our customers, and as a result our business could be materially and adversely affected.

If our security measures are breached or are perceived as not being secure, we may lose advertisers, reseller partners and distribution partners and we may incur significant legal and financial exposure.

We store and transmit data and information about our advertisers, reseller partners, distribution partners and their respective users. We deploy security measures to protect this data and information, as do third parties we utilize to assist in data and information storage. Our security measures and those of the third parties we partner with to assist in data and information storage may suffer breaches. Security breaches of our data storage systems or our third party colocation and technology providers we utilize to store data and information relating to our advertisers, reseller partners, distribution partners and their respective users could expose us to significant potential liability. In addition, security breaches, actual or perceived, could result in the loss of advertisers, reseller partners and distribution partners that could potentially have an adverse effect on our business.

We may not be able to protect our intellectual property rights, which could result in our competitors marketing competing products and services utilizing our intellectual property and could adversely affect our competitive position.

Our success and ability to compete effectively are substantially dependent upon our internally developed and acquired technology and data resources, which we protect through a combination of copyright, trade secret, and patent and trademark law. To date, we have had issued or have applications pending for the following patents:

- U.S. Patent Number 7,668,950 entitled “Automatically Updating Performance-Based Online Advertising System and Method” was issued February 23, 2010.
- U.S. Nonprovisional Patent Application Number 11/985,188 entitled “Method and System for Tracking Telephone Calls” was filed on November 14, 2007 and a corresponding divisional Patent Application Number 13/294,436 was filed November 11, 2011.
- U.S. Patent Number 6,822,663 entitled “Transform Rule Generator for Web-Based Markup Languages” was issued November 23, 2004.
- U.S. Nonprovisional Patent Application Number 12/512,821 entitled “Facility for Reconciliation of Business Records Using Genetic Algorithms” was filed on July 30, 2009.
- U.S. Nonprovisional Patent Application Number 12/829,372 entitled “System and Method to Direct Telephone Calls to Advertisers” and U.S. Nonprovisional Patent Application Number 12/829,373 entitled System and Method for Calling Advertised Telephone Numbers on a Computing Device” and U.S Patent Number 8,259,915 (issued September 4, 2012) entitled System and Method to Analyze Calls to Advertised Telephone Numbers were all filed on July 1, 2010. U.S. Respective corresponding PCT Application Numbers PCT/US11/42792, PCT/US11/42812 and PCT/US11/42819 were filed July 1, 2011.
- U.S. Nonprovisional Patent Application Number 13/176,709 entitled “Method and System for Automatically Generating Advertising Creatives” was filed July 5, 2011.
- U.S. Nonprovisional Patent Application Number 12/844,488 entitled “Systems and Methods for Blocking Telephone Calls” was filed on July 27, 2010 and corresponding PCT Application Number PCT/US11/45403 was filed July 26, 2011.
- U.S. Patent Number 7,212,615 entitled “Criteria Based Marketing For Telephone Directory Assistance” was issued May 1, 2007 owned by Jingle which we acquired in 2011.
- U.S. Patent Number 7,702,084 entitled “Toll-Free Directory Assistance With Preferred Advertisement Listing” was issued April 20, 2010.
- U.S. Patent Number 7,961,861 entitled “Telephone Search Supported By Response Location Advertising” was issued June 14, 2011 and corresponding European Application Number 5826299.99 was filed November 29, 2005.
- U.S. Nonprovisional Patent Application Number 11/290,148 entitled “Telephone Search Supported By Advertising Based On Past History Of Requests” was filed November 29, 2005.
- U.S. Nonprovisional Patent Application Number 11/291,094 entitled “Telephone Search Supported By Keyword Map To Advertising” was filed November 29, 2005.
- U.S. Patent Number 8,175,231 entitled “Toll-Free Directory Assistance With Automatic Selection Of An Advertisement From A Category” issued May 8, 2012.
- U.S. Patent Number 8,107,602 entitled “Directory Assistance With Data Processing Station” issued January 12, 2012.

In the future, additional patents may be filed with respect to internally developed or acquired technologies. Our industry is highly competitive and many individuals and companies have sought to patent processes in the industry. We may decide not to protect certain intellectual properties or business methods which may later turn out to be significant to us. In addition, the patent process takes several years and involves considerable expense. Further, patent applications and patent positions in our industry are highly uncertain and involve complex legal and factual questions due in part to the number of competing technologies. As a result, we may not be able to successfully prosecute these patents, in whole or in part, or any additional patent filings that we may make in the future. We also depend on our trademarks, trade names and domain names. We may not be able to adequately protect our technology and data resources. In addition, intellectual property laws vary from country to country, and it may be more difficult to protect our intellectual property in some foreign jurisdictions in which we may plan to enter. If we fail to obtain and maintain patent or other intellectual property protection for our technology, our competitors could market competing products and services utilizing our technology.

Despite our efforts to protect our proprietary rights, unauthorized parties domestically and internationally may attempt to copy or otherwise obtain and use our services, technology and other intellectual property. We cannot be certain that the steps we have taken will prevent any misappropriation or confusion among consumers and advertisers. If we are unable to protect our intellectual property rights from unauthorized use, our competitive position could be adversely affected.

We may be involved in lawsuits to protect or enforce our patents, which could be expensive and time consuming.

We may initiate patent litigation against third parties to protect or enforce our patent rights, and we may be sued by others seeking to invalidate our patents or prevent the issuance of future patents. We may also become subject to interference proceedings conducted in the patent and trademark offices of various countries to determine the priority of inventions. The defense and prosecution, if necessary, of intellectual property suits, interference proceedings and related legal and administrative proceedings is costly and may divert our technical and management personnel from their normal responsibilities. We may not prevail in any of these suits. An adverse determination of any litigation or defense proceedings could put our patents at risk of being invalidated or interpreted narrowly and could put our patent applications at risk of not being issued.

Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. In addition, during the course of this kind of litigation, there could be public announcements of the results of hearings, motions or other interim proceedings or developments in the litigation. If securities analysts or investors perceive these results to be negative, it could have an adverse effect on the trading price of our Class B common stock.

Our quarterly results of operations might fluctuate due to seasonality, which could adversely affect our growth rate and in turn the market price of our securities.

Our quarterly results have fluctuated in the past and may fluctuate in the future due to seasonal fluctuations in the level of mobile and Internet usage and seasonal purchasing cycles of many advertisers. Our experience has shown that during the spring and summer months of the year, mobile and Internet usage is lower than during other times of the year and during the latter part of the fourth quarter of the calendar year we generally experience lower call volume and reduced demand for calls from our mobile call advertising customers. The extent to which usage and call volume may decrease during these off-peak periods is difficult to predict. Prolonged or severe decreases in usage and call volume during these periods may adversely affect our growth rate and in turn the market price of our securities. Additionally, the current business environment has resulted in many advertisers and reseller partners reducing advertising and marketing services budgets or changing such budgets throughout the year, which may impact our quarterly results of operations in addition to typical seasonality seen in our industry.

We are susceptible to general economic conditions, and a downturn in advertising and marketing spending by advertisers could adversely affect our operating results.

Our operating results will be subject to fluctuations based on general economic conditions, in particular those conditions that impact advertiser-consumer transactions. Deterioration in economic conditions could cause decreases in or delays in advertising spending and reduce and/or negatively impact our short term ability to grow our revenues. Further, any decreased collectability of accounts receivable or early termination of agreements due to deterioration in economic conditions could negatively impact our results of operations.

We depend on the growth of the Internet and mobile and Internet infrastructure for our future growth and any decrease in growth or anticipated growth in mobile and Internet usage could adversely affect our business prospects.

Our future revenue and profits, if any, depend upon the continued widespread use of the Internet as an effective commercial and business medium. Factors which could reduce the widespread use of the Internet include:

- possible disruptions or other damage to the mobile, Internet or telecommunications infrastructure and networks;
- failure of the individual networking infrastructures of our advertisers, reseller partners, and distribution partners to alleviate potential overloading and delayed response times;
- a decision by advertisers and consumers to spend more of their marketing dollars on offline programs;
- increased governmental regulation and taxation; and
- actual or perceived lack of security or privacy protection.

In particular, concerns over the security of transactions conducted on the Internet and the privacy of users, including the risk of identity theft, may inhibit the growth of Internet usage, especially mobile and online commercial transactions. In order for the mobile and online commerce market to develop successfully, we and other market participants must be able to transmit confidential information, including credit card information, securely over public networks. Any decrease in anticipated Internet growth and usage could have a material adverse effect on our business prospects.

We are exposed to risks associated with credit card fraud and credit payment, and we may continue to suffer losses as a result of fraudulent data or payment failure by advertisers.

We have suffered losses and may continue to suffer losses as a result of payments made with fraudulent credit card data. Our failure to control fraudulent credit card transactions could reduce our net revenue and gross margin and negatively impact our standing with applicable credit card authorization agencies. In addition, under limited circumstances, we extend credit to advertisers who may default on their accounts payable to us or fraudulently “charge-back” amounts on their credit cards for services that have already been delivered by us.

Government regulation of the Internet may adversely affect our business and operating results.

Mobile and online search, e-commerce and related businesses face uncertainty related to future government regulation of the Internet through the application of new or existing federal, state and international laws. Due to the rapid growth and widespread use of the Internet, legislatures at the federal and state level have enacted and may continue to enact various laws and regulations relating to the Internet. Individual states may also enact consumer protection laws that are more restrictive than the ones that already exist.

Furthermore, the application of existing laws and regulations to Internet companies remains somewhat unclear. For example, as a result of the actions of advertisers in our network, we may be subject to existing laws and regulations relating to a wide variety of issues such as consumer privacy, gambling, sweepstakes, advertising, promotions, defamation, pricing, taxation, financial market regulation, quality of products and services, computer trespass, spyware, adware, child protection and intellectual property ownership and infringement. In addition, it is not clear whether existing laws that require licenses or permits for certain of our advertisers’ lines of business apply to us, including those related to insurance and securities brokerage, law offices and pharmacies. Existing federal and state laws that may impact the growth and profitability of our business include, among others:

- The Digital Millennium Copyright Act (DMCA) provides protection from copyright liability for online service providers that list or link to third party web sites. We currently qualify for the safe harbor under the DMCA; however, if it were determined that we did not meet the safe harbor requirements, we could be exposed to copyright infringement litigation, which could be costly and time-consuming.
- The Children’s Online Privacy Protection Act (COPPA) restricts the distribution of certain materials deemed harmful to children and imposes limitations on web sites’ ability to collect personal information from minors. COPPA allows the Federal Trade Commission (FTC) to impose fines and penalties upon web site operators whose sites do not fully comply with the law’s requirements. We do not currently offer any web sites “directed to children,” nor do we collect personal data from children.
- The Protection of Children from Sexual Predators Act requires online service providers to report evidence of violations of federal child pornography laws under certain circumstances.
- The Controlling the Assault of Non-Solicited Pornography and Marketing (CAN SPAM) Act of 2003 establishes requirements for those who send commercial e-mails, spells out penalties for entities that transmit noncompliant commercial e-mail and/or whose products are advertised in noncompliant commercial e-mail and gives consumers the right to opt-out of receiving commercial e-mails. The majority of the states also have adopted similar statutes governing the transmission of commercial e-mail. The FTC and the states, as applicable, are authorized to enforce the CAN-SPAM Act and the state-specific statutes, respectively. CAN-SPAM gives the Department of Justice the authority to enforce its criminal sanctions. Other federal and state agencies can enforce the law against organizations under their jurisdiction, and companies that provide Internet access may sue violators as well.
- The Electronic Communications Privacy Act prevents private entities from disclosing Internet subscriber records and the contents of electronic communications, subject to certain exceptions.
- The Computer Fraud and Abuse Act and other federal and state laws protect computer users from unauthorized computer access/hacking, and other actions by third parties which may be viewed as a violation of privacy. Courts may apply each of these laws in unintended and unexpected ways. As a company that provides services over the Internet as well as call recording and call tracking services, we may be subject to an action brought under any of these or future laws.
- Among the types of legislation currently being considered at the federal and state levels are consumer laws regulating for the use of certain types of software applications or downloads and the use of “cookies.” These proposed laws are intended to target specific types of software applications often referred to as “spyware,” “invasiveware” or “adware,” and may also cover certain applications currently used in the online advertising industry to serve and distribute advertisements. In addition, the FTC has sought inquiry regarding the implementation of a “do-not-track” requirement. Federal legislation is also expected to be introduced that would regulate “online behavioral advertising” practices. If passed, these laws would impose new obligations for companies that use such software applications or technologies.

Many Internet services are automated, and companies such as ours may be unknowing conduits for illegal or prohibited materials. It is possible that some courts may impose a strict liability standard or require such companies to monitor their customers’ conduct. Although we would not be responsible or involved in any way in such illegal conduct, it is possible that we would somehow be held responsible for the actions of our advertisers or distribution partners.

[Table of Contents](#)

We may also be subject to costs and liabilities with respect to privacy issues. Several companies have incurred penalties for failing to abide by the representations made in their public-facing privacy policies. In addition, several states have passed laws that require businesses to implement and maintain reasonable security procedures and practices to protect sensitive personal information and to provide notice to consumers in the event of a security breach. Further, it is anticipated that additional federal and state privacy-related legislation will be enacted. Such legislation could negatively affect our business.

In addition, foreign governments may pass laws which could negatively impact our business and/or may prosecute us for violating existing laws. Such laws might include EU member country conforming legislation under applicable EU Privacy, eCommerce, Telecommunications and Data Protection Directives. Any costs incurred in addressing foreign laws could negatively affect the viability of our business. Our exposure to this risk will increase to the extent we expand our operations internationally.

Federal and state regulation of telecommunications may adversely affect our business and operating results.

Subsidiaries of the Company provide information and analytics services to certain advertisers and reseller partners that may include information services. In connection therewith, the Company, through its subsidiaries, obtains certain telecommunications products and services from carriers in order to deliver these packages of information and analytic services.

Telecommunications laws and regulations (and interpretations thereof) are evolving in response to rapid changes in the telecommunications industry. If our carrier partners were to be subject to any changes in applicable law or regulation (or interpretations thereof), or additional taxes or surcharges, then we in turn may be subject to increased costs for their products and services or receive products and services that may be of less value to our customers, which in turn could adversely affect our business and operating results. Furthermore, to the extent we offer call recording and pay-for-call services, we may be directly subject to certain telecommunications-related regulations. Finally, in the event that any federal or state regulators were to expand the scope of applicable laws and regulations or their application to include certain end users and information service providers, then our business and operating results could also be adversely affected. The following existing and possible future federal and state laws could impact the growth and profitability of our business:

- The Communications Act of 1934, as amended by the Telecommunications Act of 1996 (the “Act”), and the regulations promulgated by the Federal Communications Commission under Title II of the Act, may impose federal licensing, reporting and other regulatory obligations on the Company. To the extent we contract with and use the networks of voice over IP service providers, new legislation or FCC regulation in this area could restrict our business, prevent us from offering service or increase our cost of doing business. There are an increasing number of regulations and rulings that specifically address access to commerce and communications services on the Internet, including IP telephony. We are unable to predict the impact, if any, that future legislation, legal decisions or regulations concerning voice services offered via the Internet may have on our business, financial condition, and results of operations.
- The U.S. Congress, the FCC, state legislatures or state agencies may target, among other things, access or settlement charges, imposing taxes related to Internet communications, imposing tariffs or other regulations based on encryption concerns, or the characteristics and quality of products and services that we may offer. Any new laws or regulations concerning these or other areas of our business could restrict our growth or increase our cost of doing business.
- The FCC has initiated a proceeding regarding the regulation of broadband services. The increasing growth of the broadband IP telephony market and popularity of broadband IP telephony products and services heighten the risk that the FCC or other legislative bodies will seek to regulate broadband IP telephony and the Internet. In addition, large, established telecommunication companies may devote substantial lobbying efforts to influence the regulation of the broadband IP telephony market, which may be contrary to our interests.
- There is risk that a regulatory agency will require us to conform to rules that are unsuitable for IP communications technologies or rules that cannot be complied with due to the nature and efficiencies of IP routing, or are unnecessary or unreasonable in light of the manner in which we offer voice-related services such as call recording and pay-for-call services to our customers.
- Federal and state telemarketing laws including the Telephone Consumer Protection Act, the Telemarketing Sales Rule, the Telemarketing Consumer Fraud and Abuse Prevention Act and the rules and regulations promulgated thereunder.
- Laws affecting telephone call recording and data protection, such as consent and personal data statutes. Under the federal Wiretap Act, at least one party taking part in a call must be notified if the call is being recorded. Under this law, and most state laws, there is nothing illegal about one of the parties to a telephone call recording the conversation. However, several states (i.e., California, Connecticut, Florida, Illinois, Maryland, Massachusetts, Michigan, Montana, Nevada, New Hampshire, Pennsylvania and Washington) require that all parties consent when one party wants to record a telephone

[Table of Contents](#)

conversation. The telephone recording laws in other states, like federal law, require only one party to be aware of the recording. A Wiretap Act violation is a Class D felony; the maximum authorized penalties for a violation of section 2511(1) of the Wiretap Act are imprisonment of not more than five years and a fine under Title 18. Authorized fines are typically not more than \$250,000 for individuals or \$500,000 for an organization, unless there is a substantial loss. State laws impose similar penalties.

- The Communications Assistance for Law Enforcement Act may require that the Company undertake material modifications to its platforms and processes to permit wiretapping and other access for law enforcement personnel.
- Under various Orders of the Federal Communications Commission, the Company may be required to make material retroactive and prospective contributions to funds intended to support Universal Service, Telecommunications Relay Service, Local Number Portability, the North American Numbering Plan and the budget of the Federal Communications Commission.
- Laws in most states of the United States of America may require registration or licensing of one or more subsidiaries of the Company, and may impose additional taxes, fees or telecommunications surcharges on the provision of the Company's services which the Company may not be able to pass through to customers.

State and local governments may in the future be permitted to levy additional taxes on Internet access and electronic commerce transactions, which could result in a decrease in the level of usage of our services. In addition, we may be required to pay additional income, sales, or other taxes.

On November 19, 2004, the federal government passed legislation placing a ban on state and local governments' imposition of new taxes on Internet access or electronic commerce transactions which expires in November 2014. Unless the ban is further extended, state and local governments may begin to levy additional taxes on Internet access and electronic commerce transactions upon the legislation's expiration. An increase in taxes may make electronic commerce transactions less attractive for advertisers and businesses, which could result in a decrease in the level of usage of our services. Additionally, from time to time, various state, federal and other jurisdictional tax authorities undertake reviews of the Company and the Company's filings. In evaluating the exposure associated with various tax filing positions, the Company on occasion accrues charges for probable exposures. We cannot predict the outcome of any of these reviews.

Risks Relating to Ownership of our Common Stock

Our Class B common stock prices have been and are likely to continue to be highly volatile.

The trading prices of our Class B common stock have been and are likely to continue to be highly volatile and subject to wide fluctuations. Since our initial public offering, the closing sale price of our Class B common stock on the NASDAQ Global Select Market ranged from \$3.00 to \$26.14 per share through September 30, 2012. Our stock prices may fluctuate in response to a number of events and factors, which may be the result of our business strategy or events beyond our control, including:

- developments concerning proprietary rights, including patents, by us or a competitor;
- announcements by us or our competitors of significant contracts, acquisitions, financings, commercial relationships, joint ventures or capital commitments;
- registration of additional shares of Class B common stock in connection with acquisitions;
- actual or anticipated fluctuations in our operating results;
- lawsuits initiated against us or lawsuits initiated by us;
- announcements of acquisitions or technical innovations;
- potential loss or reduced contributions from distribution partners, reseller partners and agencies, or advertisers;
- changes in growth or earnings estimates or recommendations by analysts;
- changes in the market valuations of similar companies;
- changes in our industry and the overall economic environment;
- volume of shares of Class B common stock available for public sale, including upon conversion of Class A common stock or upon exercise of stock options;
- Class B common stock repurchases under our previously announced share repurchase program;

[Table of Contents](#)

- sales and purchases of stock by us or by our stockholders, including sales by certain of our executive officers and directors pursuant to written pre-determined selling and purchase plans under Rule 10b5-1 of the Securities Exchange Act of 1934; and
- short sales, hedging and other derivative transactions on shares of our Class B common stock.

In addition, the stock market in general, and the NASDAQ Global Select Market and the market for mobile and online commerce companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of the listed companies. These broad market and industry factors may seriously harm the market price of our Class B common stock, regardless of our operating performance. In the past, following periods of volatility in the market, securities class action litigation has often been instituted against these companies.

Litigation against us, whether or not judgment is entered against us, could result in substantial costs and potentially economic loss, and a diversion of our management's attention and resources, any of which could seriously harm our financial condition. Additionally, there can be no assurance that an active trading market of our Class B common stock will be sustained.

Our founders control the outcome of stockholder voting, and there may be an adverse effect on the price of our Class B common stock due to the disparate voting rights of our Class A common stock and our Class B common stock.

As of September 30, 2012, Russell C. Horowitz, Ethan A. Caldwell, Peter Christothoulou and John Keister, our founders, beneficially owned 100% of the outstanding shares of our Class A common stock, which shares represented 89% of the combined voting power of all outstanding shares of our capital stock. These founders together control 90% of the combined voting power of all outstanding shares of our capital stock. The holders of our Class A common stock and Class B common stock have identical rights except that the holders of our Class B common stock are entitled to one vote per share, while holders of our Class A common stock are entitled to twenty-five votes per share on all matters to be voted on by stockholders. This concentration of control could be disadvantageous to our other stockholders with interests different from those of these founders. This difference in the voting rights of our Class A common stock and Class B common stock could adversely affect the price of our Class B common stock to the extent that investors or any potential future purchaser of our shares of Class B common stock give greater value to the superior voting rights of our Class A common stock. Further, as long as these founders have a controlling interest, they will continue to be able to elect all or a majority of our board of directors and generally be able to determine the outcome of all corporate actions requiring stockholder approval. As a result, these founders will be in a position to continue to control all fundamental matters affecting our company, including any merger involving, sale of substantially all of the assets of, or change in control of, our company. The ability of these founders to control our company may result in our Class B common stock trading at a price lower than the price at which such stock would trade if these founders did not have a controlling interest in us. This control may deter or prevent a third party from acquiring us which could adversely affect the market price of our Class B common stock.

Anti-takeover provisions may limit the ability of another party to acquire us, which could cause our stock price to decline.

Our certificate of incorporation, as amended, our by-laws and Delaware law contain provisions that could discourage, delay or prevent a third party from acquiring us, even if doing so may be beneficial to our stockholders. In addition, these provisions could limit the price investors would be willing to pay in the future for shares of our Class B common stock. The following are examples of such provisions in our certificate of incorporation, as amended, or our by-laws:

- the authorized number of our directors can be changed only by a resolution of our board of directors;
- advance notice is required for proposals that can be acted upon at stockholder meetings;
- there are limitations on who may call stockholder meetings; and
- our board of directors is authorized, without prior stockholder approval, to create and issue "blank check" preferred stock.

We are also subject to Section 203 of the Delaware General Corporation Law, which provides, subject to enumerated exceptions, that if a person acquires 15% or more of our voting stock, the person is an "interested stockholder" and may not engage in "business combinations" with us for a period of three years from the time the person acquired 15% or more of our voting stock. The application of Section 203 of the Delaware General Corporation Law could have the effect of delaying or preventing a change of control of our company.

We may not be able to continue to pay dividends on our common stock in the future which could impair the value of such stock.

Under Delaware law, dividends to stockholders may be made only from the surplus of a company, or, in certain situations, from the net profits for the current fiscal year or the fiscal year before which the dividend is declared. We have initiated and paid a quarterly dividend on our common stock since November 2006. However, there is no assurance that we will be able to pay dividends in the future. Our ability to pay dividends in the future will depend on our financial results, liquidity and financial condition.

Upon completion of the Proposed Spin-off Transaction, the quarterly dividend payments are anticipated to be transitioned from Marchex to Archeo. There can be no assurances that Archeo will continue to pay dividends at such rate or at all.

[Table of Contents](#)

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the third quarter of 2012, share repurchase activity was as follows:

<u>Period</u>	<u>Total number of shares purchased</u>	<u>Average price paid per share</u>	<u>Total number of shares purchased as part of publicly announced plans or programs</u>	<u>Maximum number of shares (or approximate dollar value) that may yet be purchased under the plans or programs (1)</u>
July 1, 2012 – July 31, 2012 (2)	85,138	\$ 2.57	57,263	1,793,940
August 1, 2012 – August 31, 2012 (2)	15,754	\$ 2.62	11,754	1,782,186
September 1, 2012 – September 30, 2012 (2) (3)	25,528	\$ 2.55	11,400	1,770,786
Total Class B Common Shares	126,420	\$ 2.57	80,417	1,770,786

- (1) We have established a share repurchase program which authorizes the Company to repurchase up to 13 million shares in the aggregate (less shares previously repurchased under the share repurchase program) of the Company's Class B common stock. No shares will be knowingly purchased from company insiders or their affiliates. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, capital availability, and other market conditions. This stock repurchase program does not have an expiration date and may be expanded, limited or terminated at any time without prior notice.
- (2) Includes 27,875, 4,000 and 7,250 shares of restricted equity subject to vesting for the periods ending July 31, 2012, August 31, 2012 and September 30, 2012, respectively, which were issued to a certain employees. We repurchased shares which were not already vested for \$0.01 share upon termination of employment.
- (3) Includes 6,878 shares of the Company's Class B common stock which were repurchased to satisfy the employees' minimum tax withholding obligations in connection with the vesting of restricted stock awards and was based on the fair market value on the vesting date.

Item 4. Mine Safety Disclosures

Not applicable.

Item 6. Exhibits

Exhibits:

†31(i)	Certification of Principal Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
†31(ii)	Certification of Principal Financial Officer pursuant to Rule 13a-14(a)/15d-14(a) as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
††32	Certification of Principal Executive Officer and Principal Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

† Filed herewith.

†† Furnished herewith.

* In accordance with Regulation S-T, the XBRL-related information in Exhibit 101 to this Quarterly Report on Form 10-Q shall be deemed to be "furnished" and not "filed."

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

MARCHEX, INC.

By: _____ /s/ MICHAEL M. MILLER
Name: **Michael M. Miller**
Title: **Senior VP Accounting and Corporate Controller
(Principal Accounting Officer)**

November 8, 2012

**CERTIFICATION PURSUANT TO RULES 13a-14(a) AND 15d-14(a),
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

Principal Executive Officer

I, Russell C. Horowitz, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Marchex, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 8, 2012

(Principal Executive Officer)

**CERTIFICATION PURSUANT TO RULES 13a-14(a) AND 15d-14(a),
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

Principal Financial Officer

I, Michael A. Arends, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Marchex, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 8, 2012
